

TEENS TUNING WORKSHOP.

A child will be living in a dreamy world once it enters the teenage. Teenage is a bridge between childhood and adulthood. So, stepping into teenage leaving behind those innocent years and continuing the life journey towards adulthood poses a lot of challenge to the child, parents as well as teachers.

The personality of the child gets crystallised during teenage. Therefore proper guidance will go a long way in moulding the personality of the child.

It is very common that parents and teachers notice a major shift in the attitude and behaviour of the children studying in 6th and 7th standard.

As mentioned earlier teenagers are in their own dreamy world and hence many a time they are unable to relate to the reality around them. The handling of relationships with parents, peers, teachers and others, difference between confidence and arrogance, balancing of academics and other interests will take a heavy toll on the mind of teenager leading to stress and other behavioural complications.

The 'Teens Tuning' Workshop will address these issues in a unique interactive way and kindles an awareness of how to dream more and more and make each one of them real for sure. Teenagers will be given the seed of understanding that they are all extraordinary persons and also the knowledge of nourishing and growing it into a big tree.

The 'Teens Tuning' Workshop is conducted for a group of twenty to thirty children and the duration is three hours each for five days.

To sum up, this workshop is designed to help transform adorable adolescents to lovable teens and finally into responsible adults. Achieving success ethically and maintaining social responsibility is another unique feature of the workshop.
