

# Developing Programming with C++

## Contents

### 1. Principles of Object Oriented Programming

- Software Evolution
- A Look at Procedure Oriented Programming
- Object Oriented Programming Paradigm
- Basic Concepts of Object Oriented Programming
- Benefits of OOP
- Object Oriented Languages
- Applications of OOP

### 2. Beginning with C++

- Applications of C++
- Structure of C++ program
- A Sample C++ program
- An Example with a class
- Creating a Source File
- Compiling and Linking
- Case Studies

### 3. Tokens, Expressions and Control Statements

- Introduction
- Tokens
- Keywords
- Identifiers and Constants
- Basic Data Types

- User-Defined Data Types
- Derived Data Types
- Declaration of Variables
- Operators in C++
- Scope Resolution Operator
- Memory Management Operator
- Type Cast Operator
- Implicit Conversions
- Operator Overloading
- Operator Precedence
- Control Structures
- Case Studies

#### **4. Functions in C++**

- Introduction
- The Main Function
- Function Prototype
- Call by Reference
- Inline Functions
- Default Arguments
- Function Overloading
- Friend and Virtual Functions
- Math Library Functions
- Case Studies

#### **5. Classes and Objects**

- Introduction
- Defining Member Functions
- A C++ Program with Class

- Making an Outside Function Inline
- Nesting of Member Functions
- Private Member Functions
- Arrays within a Class
- Memory Allocation for Object
- Static Data Members
- Static Member Functions
- Arrays of Objects
- Objects as Function Arguments
- Friendly Function
- Returning Objects
- Case Studies

## **6. Constructors and Destructors**

- Introduction
- Constructors
- Parameterized Constructors
- Multiple Constructors in a class
- Constructors with Default Arguments
- Dynamic Initialization of Objects
- Copy Constructors
- Destructors
- Case Studies

## **7. Operator Overloading and Type Conversions**

- Introduction
- Defining Operator Overloading
- Overloading Unary Operator
- Overloading Binary Operator

- Rules for Overloading Operators
- Type Conversions
- Case Studies

## **8. Inheritance: Extending Classes**

- Introduction
- Defining Derived Classes
- Single Inheritance
- Multi level Inheritance
- Multiple Inheritances
- Hierarchical Inheritance
- Hybrid Inheritance
- Virtual Base classes
- Abstract Classes
- Constructors in Derived Classes
- Case Studies

## **9. Pointers, Virtual Functions and polymorphism**

- Introduction
- Pointers
- Pointers to Objects
- This Pointers
- Pointers to Derived Classes
- Virtual Functions
- Pure Virtual Functions
- Case Studies

## 10. Managing Console Input/Output Operations

- Introduction
- C++ Streams
- C++ Stream Classes
- Unformatted I/O Operations
- Formatted Console I/O Operations
- Case Studies

## 11. Working with Files

- Introduction
- Classes for File Stream Operators
- Opening and Closing a File
- Detecting end – of –file
- File Pointers and their Manipulations
- Updating File
- Case Studies

## 12. Templates

- Introduction
- Class Templates
- Class Templates with Multiple Parameters
- Function Templates
- Function Templates with Multiple Parameters
- Member Function Templates
- Case Studies

### 13. Exception Handling

- Introduction
- Basics of Exception Handling
- Exception Handling Mechanism
- Throwing Mechanism
- Catching Mechanism
- Re throwing an Exception
- Case Studies

### 14. Manipulating Strings

- Introduction
- Creating String Object
- Manipulating String Objects
- Relational Operators
- String Characteristics
- Accessing Characters in String
- Comparing and Swapping
- Case Studies

### 15. Project

- Discussing a Project
