

HYPERMESH

1. Introduction to FEA
2. Types of Analysis
3. Basic statics and strength of materials
4. Introduction to Meshing
5. Line Meshing
6. Surface Meshing
7. Solid Meshing
8. Special Elements and Techniques
9. Linear static analysis using Meshing elements
10. Building solid elements and Solid Map panel
11. Spot weld using Geometry Nodes and Elements
12. Quality Index Mesh Optimization Features
13. Creating Connectors, Morphing process and Morphing a 2D model
