

GNIIT ARCHITECTURE

The GNIIT Program Architecture has been aligned with the academic semester system, to help college students complete their GNIIT course during graduation. GNIIT has 12-15 week 'Terms' as units (similar to the College semesters of 18-20 weeks). The program will consist of 7 such 'Terms' to be done along with Graduation. Since GNIIT's 'Terms' are aligned to College Semesters,

students have the flexibility to take a break between 'Terms' to accommodate their college exams.

This year, GNIIT gets further upgraded with content with addition of Digital Transformation specialisation term. The program is also mapped to global technology certifications to enable the students to seize the global career opportunities.
