

BASIC PHOTOGRAPHY WORKSHOP

Exposure Triangle

Photography is about manipulating light. A solid understanding of how light can be controlled is a must.

Light Metering Mode

To control light, you must know how the light is measured. .

Shooting Modes

There are situations where you want your Camera to take on responsibilities so that you can concentrate on composing a scene. Shooting Modes will help you in such situations

Exposure Compensation

Relying on your Camera to measure light is k in many situations. However, you may want to tweak what Camera has measured to create an image as per your creative thinking. Exposure compensation is your key here.

Understanding perfect focusing

As a photographer, your images should be crystal clear. Understanding focusing is your stepping stone towards crystal clear images.

White Balancing

For that perfect color image...

Basic Composition Rules

One of the most important aspect of Photography is Compositional rules.

Rule of thirds

The Golden Ratio

The Golden Triangle

Rule of Odds

Leaving space

Fill the frame

Simplification
