

Feedback from students / Colleagues and Customers:

-Not many people can inspire you the way Dr. Gowri can!!....., I found him extremely down to earth and approachable. He is a highly learned person and we were really fortunate to have an opportunity to interact with him.
-I've had the good fortune of acquiring niche performance modelling, design & engineering skills, working in the leadership of Dr. Gowri..... I automatically got a coach who would motivate us & create opportunities for us to go beyond ourselves & achieve what we never thought we could achieve; for eg. the IEEE paper publication was one such..... above all a kind and experienced mentor who would correct us just at the right times. At another level of leadership vision, candor, creativity and values are anyway part of his forte! I have seen him lead the team and take it from one success to another; keeping the team motivated even in some very tough times.
-It's a wonderful experience to work with 'doc' - he instilled the theme 'business oriented research' in me - which today I value the most. Doc is a unique combination of academic scholarship blended with the right sense of doing business.he has the skill of motivating people - right from graduate entry resources to sales representatives for doing the 'right things'
- comes with a rare ability of R&D orientation tempered with business understanding. He is a man of his words and delivers on his promise. He is a wonderful leader and a great human and his team loved to work for him. Doc built the Performance Engg and Modelling & Simulation practices at Tech Mahindra.....
-I have been greatly influenced by his leadership, thought process, ability to look at challenges from opportunity perspective and provide absolute simple but effective solutions. He is a good business man apart from being technically savvy, which is a rare combination.friendly, open and broad minded, always endorsing open door policy. He provokes his colleagues and teams to ensure they are always delivering beyond their dreams!
-professionally he is very clear on his subject. He is focused to the point of perfection..... he knows to keep his team together.....he has a very analytical thought process.....
