

1. About of IIB and requirement of IIB.
2. IIB Runtime components (Node, Integration server etc.)
3. Difference between WMB and IIB.
4. How to create Node, integration server.
5. What is message flow (Application, Libraries, Integration services) message set etc.
6. Different type of protocols supported by IIB.
7. How IIB can invoke different protocols.
8. Different types parser(XMLNSC,MRM,DFDL,SOAP).
9. Different Logical tress.
10. MQ nodes.
11. HTTPS nodes.
12. Soap Nodes.
13. Routing nodes.
14. Transformation Nodes.
15. How to deploy Msg flow in Integration server/EG.
16. How set Debugport and EG port.
17. ESQL overview.
18. Samples on one format to another format.
19. Samples using Routing nodes in different flows.
20. Samples on HTTP and SOAP.
21. Samples on Aggregation and Collector nodes.
22. Samples on Timer nodes.

23. Samples on Files Nodes
24. How handle Exceptions.
25. WMBv7 to IIB Migration/Upgrade.
26. Guidance on Certification.
27. What is new in IIB V10 and few samples with detailed explanation.
