

"LIFE IS MATHS"- It is emerging from Zero and during the life time performs the four fundamental operations of + -, \times \div and ultimately vanishes to infinity(∞).

Dear Students,

I welcome all of you to **BSMC** and solemnly wish success to each one of you. The **BSMC** addresses the imperatives of collaborative and cross-disciplinary research with a focus on the mathematical industry. Mathematics is the cheapest science . Unlike Physics or Chemistry, it does not require any expensive equipment. All one needs for mathematics is pen and paper.

For me, Success means 100% result. Your dedication and directed efforts will get your destination of **Board, IITs and other competitive examinations**. I am looking same into the future, it is my personal desire to see all BSMC students should achieve their **goal**. BSMC is an important component of growth in an academic context.

Mathematics provides the foundation for studying engineering, the physical, biological and health sciences, economics, business, computer science, statistics and many other fields.

Students with degrees in mathematics have a wide variety of career **opportunities**. Some pursue careers in the teaching of mathematics. Others pursue lucrative positions in fields such as engineering, operations research, computer programming, finance, data analysis, and law.

I wish good luck for the newly started batches and also the running batches, may we secure a better results this year.
