

TASK 2 Test 31

You should spend about 40 minutes on this task. Write about the following topic. Write at least 250 words.

Nowadays many countries have very cosmopolitan cities with people from all over the world. How can the government ensure that all these people can live together harmoniously?

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

The world is becoming a global village. The mushrooming of sophisticated metros in almost every nation is encouraging this trend. So, the all important question is how the authorities can guarantee a peaceful environment in these areas. This essay will discuss this growing trend and suggest solutions to ensure peace and stability in major cities.

One of the main reasons for this situation are the technological developments in multiple sectors. To be specific, improvement in aviation sector is making inter-continental travel less time-consuming and cheaper. In addition, the way in which information technology has grown in the last two decade resulted in the attitude with which people were doing business. For instance, business process out sourcing method is forcing developed countries business tycoons to move to third world countries in search of cost effective functioning. This resulted in talent transfers, which in turn paved way to people moving to different metros.

The concerned authorities can depend on various methods to ensure safety for the foreign citizens and harmony in their cities. Firstly, they should bring a feeling of acceptance among natives. This can be achieved by creating awareness about the culture and tradition of other country and make them understand, even though the way of life might slightly vary we all are having the same emotions. Secondly, the locals should never be encouraged to have a feeling that the guests are there to malign their customs and traditions. So, more and more opportunities should be created to share ideas and customs aiming cordial inter-community or inter-racial relationships.

To conclude, the existing global village phenomenon is here to stay. There is no chance of stopping this growth to existing suburbs and then in to rural areas. As far I am concerned, if handled in a proper way this is not at all factors to worry. Rather, an occasion to celebrate, and shout loud that we are all one, and no caste, creed, race, or religion can divide the spirit of humanity.
