## The Factor Foundation Rule

If $a$ is divisible by $b$, and $b$ is divisible by $c$, then $a$ is divisible by $c$ as well

If we know that 18 is divisible by 9 , and 9 is divisible by 3 , then 18 is divisible by 3 as well

Conversely, if $d$ is divisible by two different primes, $e$ and $f$, then $d$ is also divisible by exf

In the below factorization tree, since 18 is divisible by 3 and 2,18 is also divisible by $3 \times 2=6$
