

Hi all, this is Chitra Das and I conduct home tuitions from Grade 1 to grade 8. Introducing myself, I have completed B.Tech in Information Technology and have passion towards teaching which I am doing since 5 years.

I teach English, Hindi, Mathematics, Physics, Chemistry, Biology, History, Civics, Geography and Computers. Those parents who are worried about their kid's studies please sit back and relax. I promise that your kids will get good guidance and knowledge by joining my tutorial.

I use many new innovative ways of teaching the kids through live examples and pictorial representations which kids find very interesting and this makes them enjoy the subjects which they think would be tough and boring. I also prepare them to crack some competitive exams which will help them in the future.

Please contact me at +918340350625 for further details. Your calls are always welcome. Thank you for the time to read this introductory document.
