INIFD Academy Of Interiors has been Supported by Leading Giants of the Industry like CIA International !!

CIA International has been reinventing children's bedrooms from day one. The objective is always the same: to find new furnishing solutions to meet varying tastes and needs. Children, Young People and Parents. The first patent dates back to 1977. Since then the company's innovative ideas have made history: from the Big Bang All-in-One Bed to the Rally collection, from the Flag bookcase to CIA International's first "emotional wardrobe": the Display wardrobe.

CIA International has based its production philosophy on these rules and has been working to enhance these over the last 40 years. How? By listening to customer requirements: to parents but above all to children and young people. And by creating collections e innovative patents that reinvent the spaces with truly surprising results: it's a true pity they're called children's rooms!

A series of ideas and collections that have paved the way in the furnishing sector. Because CIA International is not just children's bedrooms. A willingness to adapt to different criteria and requirements has given the company the drive to provide furnishings for living areas too. Quasar Flag was thus created a collection of linear and essential solutions for the contemporary home.

Each CIA International design has the following common denominators: innovation, made in Italy and sustainability. Plus an original, unique style.
