

**Felix-ITs**

**iOS**

### **About Us:**

Felix-ITs is one of the best training institutes in Pune for Mobile Application Development. Felix-ITs conducts the mobile application trainings/ courses in Pune on iOS, Android & HTML5 & CSS3. The thing that distinguishes Felix-ITs from other mobile application training institutes is that our main focus lies in providing in-depth knowledge of key concepts to our participants. We aim to mould students to become expert professionals by following a step-by step training process. Each of our courses is designed in a way that begins with the basics of mobile application technology, moving to the most advanced concepts, with every step.

### **Features:**

- ❖ Unique Agile Training Methodology for learning Fundamentals of Mobile Apps
- ❖ Courses designed in consultation with Industry experts
- ❖ Smaller Class Size for personal attention
- ❖ Experienced Industry expert faculties
- ❖ Opportunity to work on projects
- ❖ HANDS-ON, Interactive Training Approach on Apple/ Android devices
- ❖ Learn to develop application and deploy on Appstore
- ❖ Mock interview sessions.
- ❖ Placement assistance to our students
- ❖ Flexible weekend batches for Professionals
- ❖ Eliminating the Employability Gap for students

### **About iOS:**

iOS (previously iPhone OS) is a mobile operating system developed by Apple Inc. and distributed exclusively for Apple hardware. Apple is reported to have 9 Million Apple Registered Developers with the youngest developer aged 13. The developers have increased to 47% since 2013. You require knowledge of C, C++, Objective C and Swift programming language to develop APPs in iOS.

## Felix-ITs

### Course Contents:

**Overview of Swift:** Swift builds on the best of C and Objective-C but does not have the constraints of C. Here we will discuss the role of Swift, why Apple developed it and the problems it tries to solve.

**Objective-C:** We offer training for objective-C programming, an important programming language, used for writing software for iOS.

**X code:** Complete knowledge of how to use X-code6, an Integrated Development Environment, which possesses the entire set of software development tools to develop iOS.

**Cocoa touch:** You learn about the Cocoa touch, the key framework for building iOS apps.

**Views and view controllers:** At Felix-ITs, we teach you about view controllers that act as a skeletal structure to build the mobile applications.

**Table views:** This is a pre-built controller provided by Apple to manage tabular data efficiently.

**Navigation and tab bar controllers:** These controllers will aid you to build hierarchical and multi-mode apps.

**Keyboard input and gestures:** We train you to develop efficient mobile apps by providing you training to use V-keyboard as well as touch screen.

**Web services:** We provide you with the knowledge of communicating with remote web services.

**Core data basics:** This topic will help you to learn the use of app data modeling tools to model the data and also manage model relationships.

**Transitioning to the iPad:** This section of the course will teach you to build effective apps for the iPad.

**Performance and debugging:** Apart from being able to develop an iOS app, we also teach you to handle situations when the app shows errors.
