- ❖ Placement assistance to our students
- ❖ Flexible weekend batches for Professionals
- ❖ Eliminating the Employability Gap for students
- ❖ Coverage of Javascript and JQuery in this training.

About HTML5 & CSS3:

HTML is a markup language for describing web documents (web pages). It stands for **Hyper Text Markup Language**. HTML5 is the latest HTML standard. It is specially designed for delivering rich web content without additional plugins. HTML5 has new form elements and new APIs to build the web applications easily. It is the tree structure that describes the content of the webpage. CSS (**Cascading Style Sheets**) is the language for describing the transformation of the HTML structure into pixels. These styles define how to display the HTML elements.

Course Contents:

HTML 5

- HTML5 and structuring content
- HTML5 and ARIA roles
- Mark-up for web forms 2.0
- Microdata and SEO quick wins
- HTML5 and design patterns
