Internship Program at StartPoint Technologies Pune

- **StartPoint Technologies** is Training initiative which is founded by IT and domain experts having combine experience of more than 50+ years with great technology experience and passion to share knowledge. The vision of Startpoint is to fill the gap between education and IT industry. Startpoint delivers Training with corporate training curriculum and standards specific to emerging Technologies space. Here we provide direct industry platform to learn and work on live projects under the guidance of IT Managers. We have Customized Training to suit your Ambitions, Preferences, Constraints and as per IT industry Needs.
- While interacting with the industry experts the most important aspect that came to light is that the fresher's are failing to achieve their mark in the industry due to lack of updated technical, practical skills and knowledge.
- Most of the time, one finds the individual exceptionally good in theoretical knowledge but when it comes to its practical implementation; they do not stand up to the industry standards.
- At **StartPoint Technologies** we understand this problem and hence we have designed a very unique concept of "**On Job Training**" for those fresher's aspirants looking out for an entry into the IT industry.
- **What is ON JOB TRAINING Program?**
On-the-job training (OJT) is a form of training taking place in a normal working situation. If you want to start career in IT then you need to first understand today's IT industries requirement and should get training according to it.
Today IT industry not required just fresher who knows the technology but they require fresher's having knowledge of project management and Industry standards.

"Today small and middle scale IT companies requires trained fresher's who can work from DAY ONE. Do you have enough practical knowledge to start work from DAY ONE?"

Our ON JOB TRAINING program is designed considering all this facts. Its fully practical oriented program carried out with IT Industry standards.

Why StartPoint?
