Containerization and Docker – table of contents

Introduction to Container and Docker
Docker architecture
Docker eco system
Docker objects
hub.docker.com
creating credential on dockerhub
creating repository in dockerhub

Docker container
Understanding docker command and help
Exploring container commands and help
using docker container commands

Docker container and Image
Left-over of docker container commands
listing the image commands and help
understanding Dockerfile and its instructions
Dockerizing app
Creating custom image
docker login command
tagging image, pushing image on to personal repo

Docker image continued
Best practices of Dockerfile
Using arguments, ports etc.
Using multiple Dockerfile for different environments

Docker Network and Docker volume
Understanding network types
create, remove and attach and detach network
Understanding Docker volume types
using bind volume and mount volume
how to persist volume

Docker environment variables, secret and service

Introduction to docker config and secret
use cases
Overview of Docker service
Understanding docker-compose cli and yaml
Understanding docker stack deployment
examples of creating service

Orchestration with SWARM

Introduction to container orchestration
Understanding and configuring SWARM cluster
Deploying services on SWARM cluster
Understanding load balancing, scaling etc.

Kubernetes and Cloud Native Associate (KCNA) Exam Curriculum

This document provides the curriculum outline of the Knowledge, Skills and Abilities that a Kubernetes and Cloud Native Associate (KCNA) can be expected to demonstrate.

KCNA Curriculum

Kubernetes Fundamentals
• Kubernetes Resources
• Kubernetes Architecture
• Kubernetes API
• Containers
• Scheduling

Container Orchestration
• Container Orchestration Fundamentals
• Runtime
• Security
• Networking
• Service Mesh
• Storage

Cloud Native Architecture
• Cloud Native Architecture Fundamentals
• Autoscaling
• Serverless
• Community and Governance
• Personas
• Open Standards

Cloud Native Observability
• Telemetry & Observability
• Prometheus
• Cost Management

Cloud Native Application Delivery
• Application Delivery Fundamentals
• GitOps
• CI/CD
