1. Getting Started with Premiere Pro

- **Intro to the Interface**: Explain the layout—workspaces, panels, timeline, and tools.
- **Setting Up a New Project**: Walk through creating and organizing a project.
- **Importing Media**: Show how to import video, audio, and graphics into the project.
- **Basic Timeline Navigation**: Zooming, moving along the timeline, and shortcuts.

2. Essential Editing Skills

- **Basic Cuts and Trimming**: How to cut, trim, ripple, and roll edits.
- **Working with Layers and Sequences**: Explain video and audio layers, nesting sequences.
- **Using Key Tools**: Razor, selection, slip, and slide tools.
- **Adding B-roll**: Demonstrate layering B-roll clips and using the cutaway technique.

3. Transitions and Effects

- **Adding Transitions**: How to use cross-dissolve, dip to black, and other transition effects.
- **Video Effects**: Overview of key video effects—color correction, sharpen, blur.
- **Text and Titles**: How to add and animate basic titles, lower thirds, and credits.

4. Color Correction and Grading

- **Basic Color Correction**: Adjust brightness, contrast, highlights, and shadows.
- **Using Lumetri Color**: Explain Lumetri scopes, color wheels, and curves for more detailed correction.
- **Creating a Cinematic Look**: Teach color grading techniques and LUTs.

5. Working with Audio

- **Audio Basics**: Importing audio, syncing, adjusting volume levels.
- **Using Essential Sound**: Clean up audio using the Essential Sound panel.
- **Applying Audio Effects**: Reverb, EQ, and other sound effects.
- **Music and Sound Effects**: Where to find royalty-free music, syncing it, and using sound effects.

6. Keyframing and Animation Basics

- **Using Keyframes**: Show how to animate position, scale, opacity, and rotation with keyframes.
- **Basic Motion Graphics**: Explain the basics of animating text and graphics.
- **Simple Masking and Tracking**: Show how to mask elements and apply tracking to objects.

7. Advanced Techniques

- **Green Screen and Chroma Key**: Teach how to use Ultra Key to remove green

screen backgrounds.
- **Speed Ramping and Slow Motion**: Show how to apply speed ramping and time remapping effects.
- **Advanced Masking**: Animate masks for more complex effects.
- **Working with Proxies**: How to use proxies for editing large, high-resolution files.

8. Exporting and Rendering

- **Export Settings**: Explain different formats for YouTube, Instagram, etc.
- **Presets and Compression**: Which presets to use and how to control file size.
- **Using Adobe Media Encoder**: Benefits and workflows for large projects.

9. Tips, Tricks, and Workflow Optimization

- **Best Editing Shortcuts**: Share must-know shortcuts to speed up editing.
- **Organizing Projects**: Explain efficient folder structures and naming conventions.
- **Avoiding Common Mistakes**: Tips for common issues (frame rate mismatches, media offline errors).
- **Improving Editing Speed**: Show techniques and habits to edit faster.

10. Specialized Content (Optional Advanced Modules)

- **Creating Instagram/Facebook Stories**: Vertical video editing tips and export settings.
- **Multi-Camera Editing**: How to edit footage from multiple cameras.
- **Collaborative Editing**: Syncing projects with others using Team Projects.
- **Integrating After Effects**: Importing After Effects projects into Premiere.
