

Creative Skills

By Kaushika

Project Goals

- To develop and enhance their awareness and understanding of the natural world through a thorough study of design principles and observational practices.
- Students will be introduced to a wide array of materials and methods. These will include traditional and historical practices as well as those more contemporary and innovative
- Ultimately, students will make art that is intellectually honest, personal, and useful as a means of better understanding their lives and experiences

Methodology

- **Practical Way**

Flipped Classroom, Project based learning,
Collaborative learning, Gamify the learning process.

- **Teach Emotional
Intelligence**

Encourage mindfulness and stress management
techniques, help students develop confidence in their
creative abilities.

Skills

Net
