

Roopkumar Murali

Founder & Lead Trainer – Excel Wizardd

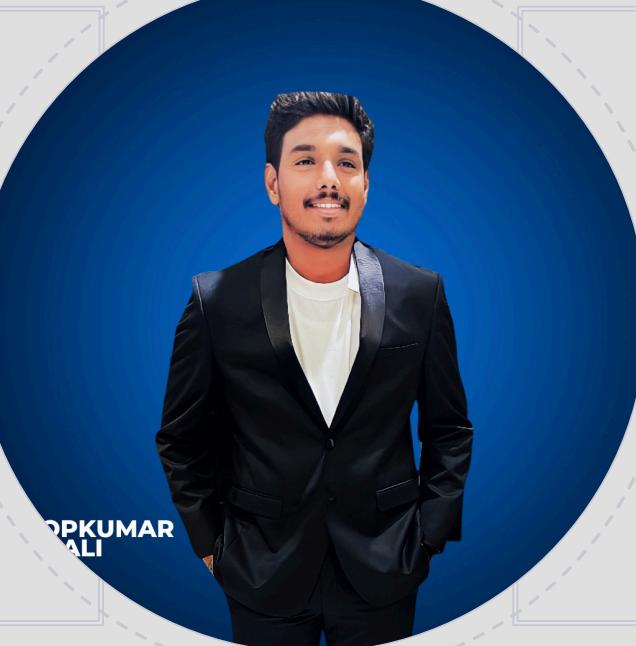

I am Roopkumar Murali, the founder of Excel Wizardd. For more than eight years, I have been training students, working professionals, and corporate teams in Excel and related Microsoft tools. Over this journey, I have worked closely with people from very different backgrounds – freshers entering their first job, professionals struggling with daily reports, MBA students preparing for placements, and corporate teams looking to improve productivity.

What I do is simple. I help people use Excel in a way that actually works in real offices.

Most learners who come to me are not bad at Excel. They are simply overwhelmed. My role is to remove that confusion, simplify the process, and help them feel confident in their work.

Excel Wizardd

Approach

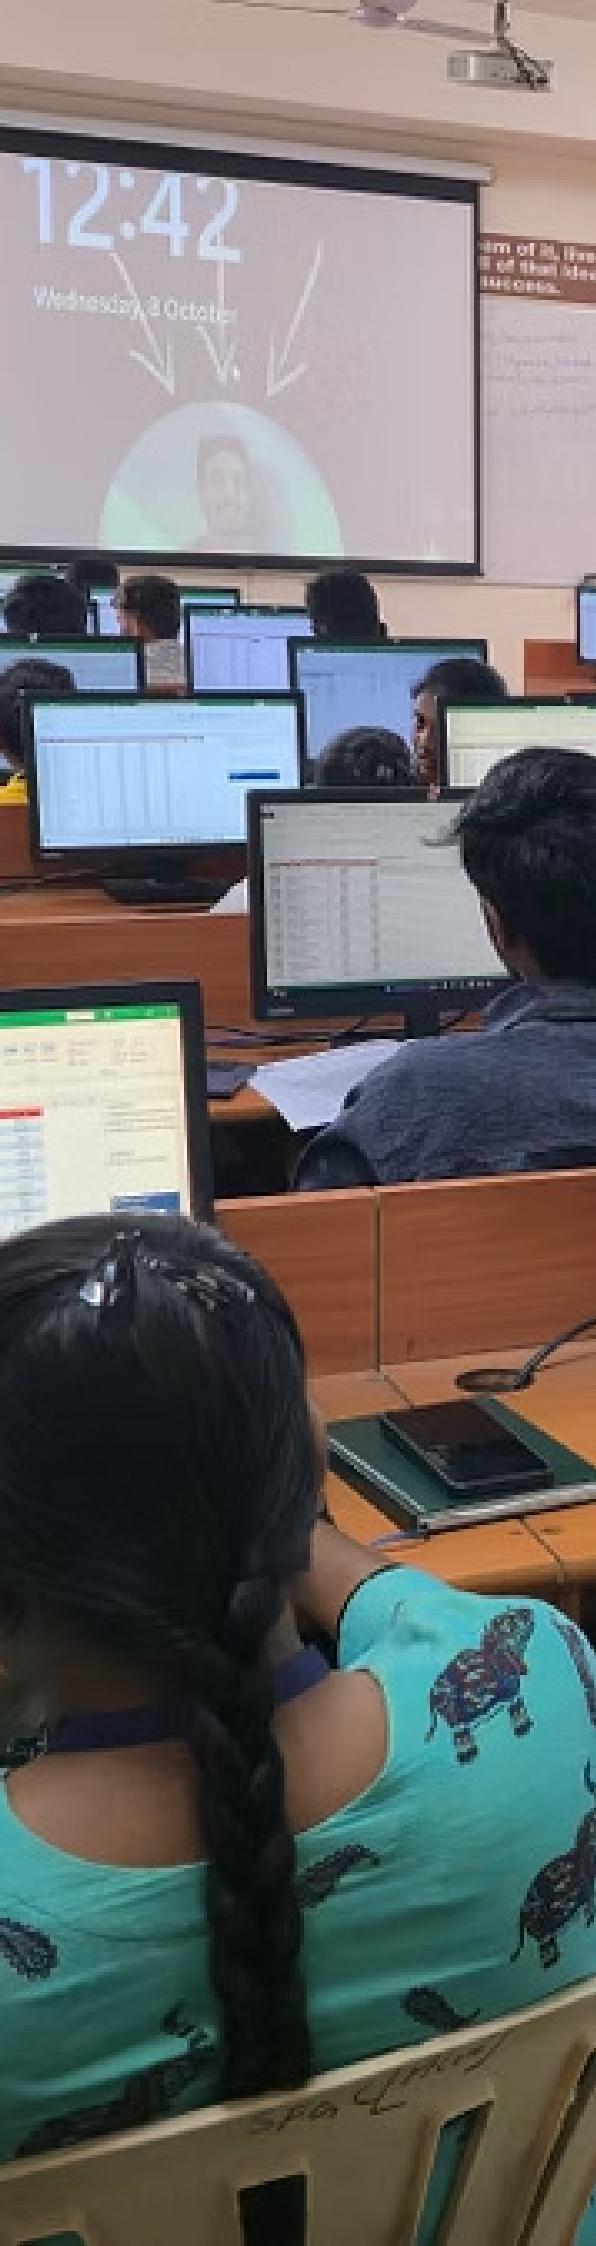

Simplify Excel
for real offices

Learners

Freshers,
Executive
professionals,
MBA Students,
Corporate Teams,

Training Outcome

Confidence,
clarity,
productivity

What I Specialize In

My core expertise is in **advanced and practical use of Microsoft tools**, especially Excel. I focus on how these tools are used in real work environments, not just how they work technically.

Advanced Excel

Reporting, analysis, and daily work with real office datasets

Excel Automation

Formulas, tools, and VBA to reduce manual work

Power BI

Reporting-focused dashboards for business insights

Office Tools

PowerPoint, Word, and Access with real business use cases

AI Integration

ChatGPT and Microsoft Copilot with Excel for efficiency

My strength lies in combining **real-world business problems with simple explanations and modern tools**, so learners can apply what they learn immediately.

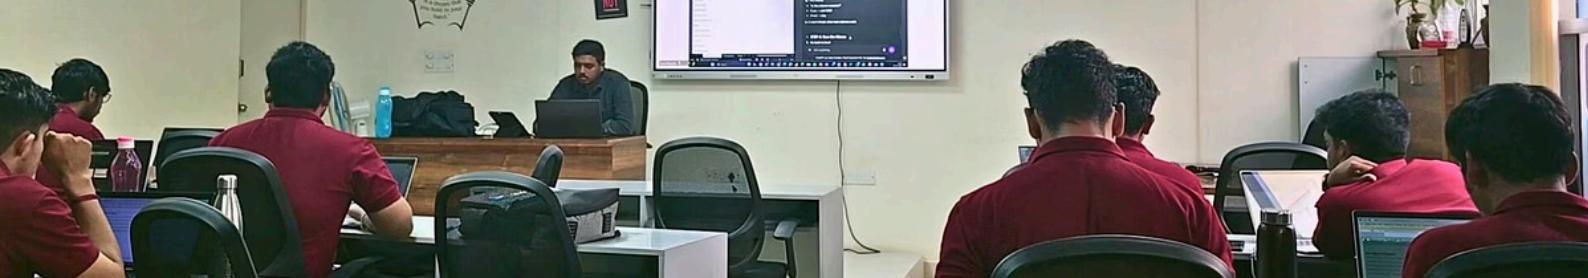

How I Teach

I teach it the way it is used at work — step by step, with context.

Every session focuses on:

I strongly believe that learning should feel safe. There is no rush, no judgment, and no unnecessary complexity. If a learner understands clearly, the skill stays with them.

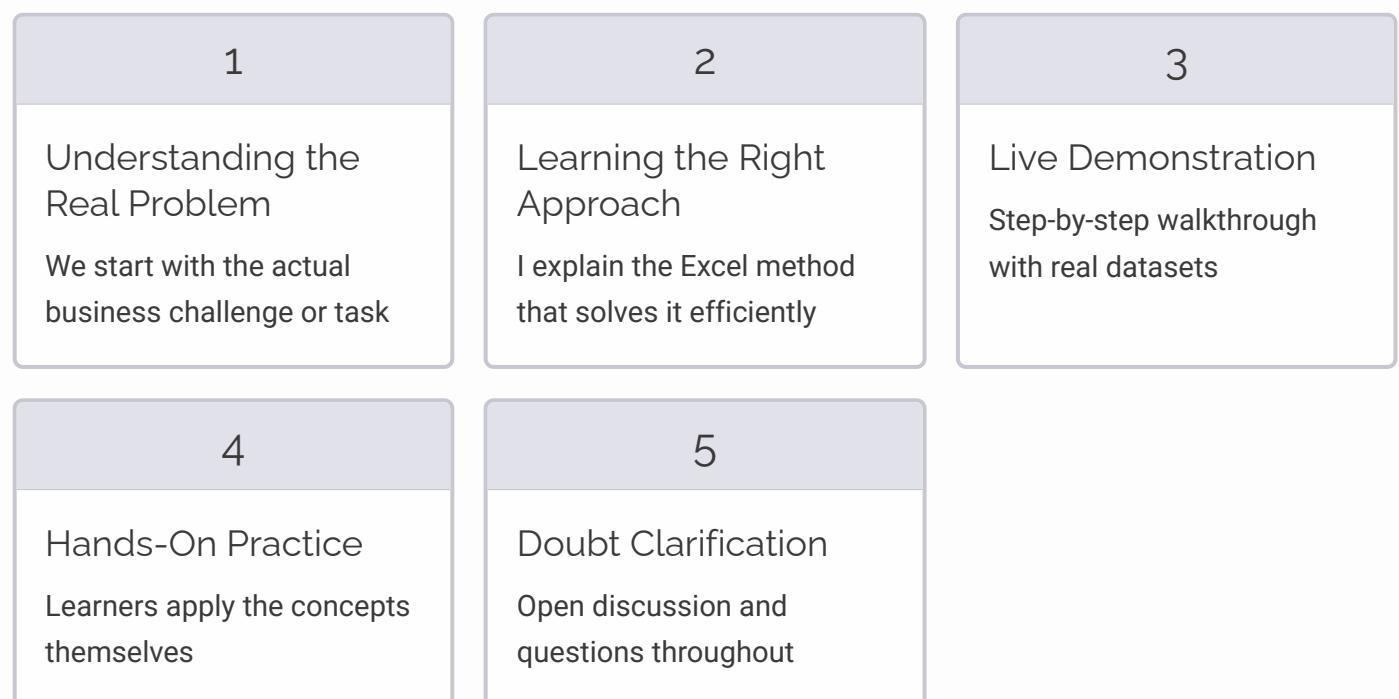

How My Training Works

What a Typical Session Looks Like

My sessions are calm, structured, and practical. I don't rush through topics or overload learners with information. Every session moves step by step, allowing learners to understand, practice, and ask questions comfortably.

I usually begin by explaining **why a concept is needed** and **where it is used in real work**. Only then do we move into how it actually works in Excel.

This structure helps learners stay engaged and confident throughout the session.

What I Provide to Learners

Every learner receives more than just a live session.

Real-World Practice Datasets

Not sample or textbook data – actual office-style files

Step-by-Step Guidance

Clear explanations during every session

Practical Use Cases

Examples from real office work scenarios

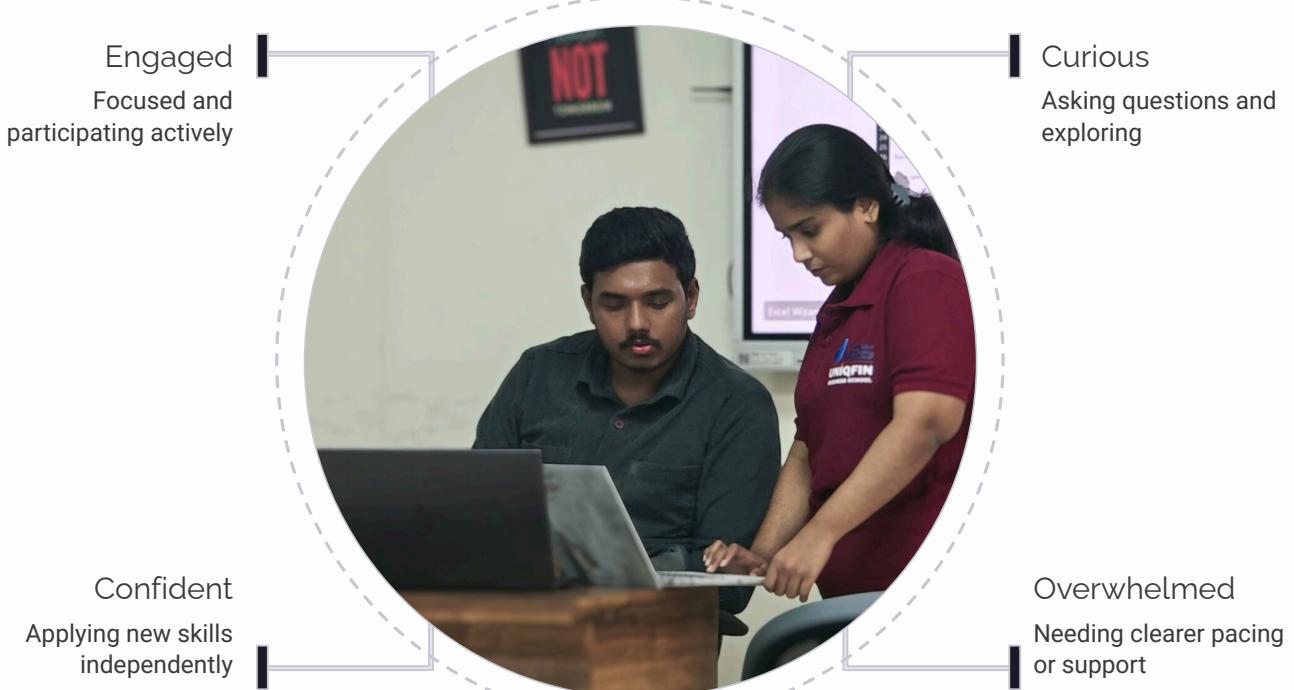

Time to Practice & Clarify

No rushing – everyone gets the time they need

Ongoing Support

Clarity and help even after the session ends

The focus is always on application, not memorization.

Learning Environment

I strongly believe that people learn best when they feel comfortable.

No Question is Silly

Every question is welcomed and answered with care

Mistakes Are Part of Learning

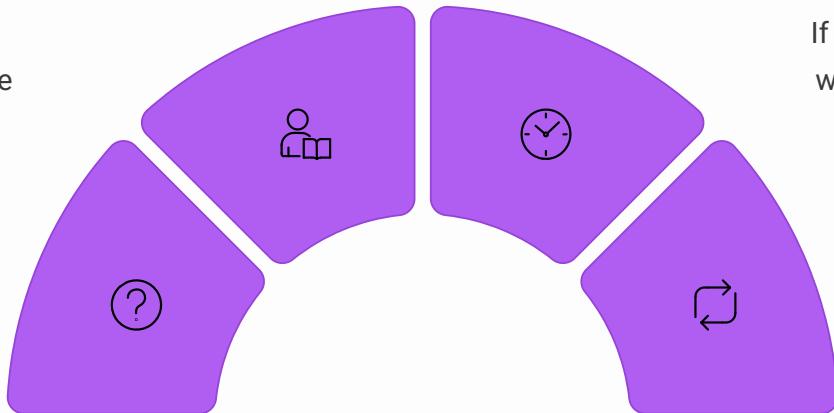

Errors help us understand better – they're encouraged

Everyone Gets Time

No one is left behind or rushed through concepts

Concepts Are Repeated

If something isn't clear, we go through it again

This creates an environment where learners can focus on learning, not on keeping up.

Why This Works

Because learners don't just watch – they **do**.

Apply Concepts Immediately

Use what you learned right away at work

Work Faster with Confidence

Complete tasks quicker and with accuracy

Reduce Manual Effort

Stop doing repetitive tasks the hard way

Understand Logically

Know the why behind the how, not just steps

Corporate & Professional Training

These sessions focus on saving time, reducing errors, and improving reporting quality.

Some of the key engagements include:

Ernst & Young (EY) Advanced Excel training for over 100 employees with job-ready shortcuts	Standard Chartered One-on-one professional training for finance professionals
Wipro Excel automation and reporting skills training	Jaguar Land Rover Advanced Excel and dashboard creation for senior staff
PhonePe Monthly salary reconciliation automation	Honeywell MIS reporting and data analysis training
Essae & Safarn Groups Executive-level dashboard creation and reporting support	

In many cases, the training directly resulted in:

Automation & Real-World Projects

Along with training, I have guided and executed multiple real-world automation projects using Excel, VBA, Power Query, and Microsoft tools.

Email Automation
Automated communication to 500+ employees, saving hours of manual work

RPA-Style Package Generation
Workflow automation for General Motors using Excel and VBA

Salary Reconciliation

Monthly automated reconciliation system for PhonePe finance team

MIS Reporting Dashboards

Operational and finance dashboards for real-time decision making

GSTR-2A Reconciliation

Reduced months of manual GST work to days through automation

Small-Scale ERP

Built using Microsoft Access and VBA for work allocation and tracking

These projects help learners see how Excel is actually used beyond formulas.

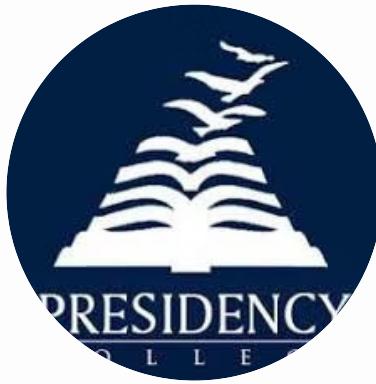

Colleges & Institutes

I have worked closely with colleges and training institutes to deliver **placement-focused and job-ready programs**. These programs focus on practical skills, interview readiness, and real workplace expectations.

Students

What Learners Say

"Roop is an excellent coach whom you can trust. He will ensure that student needs are met in time. Dedicated, passionate and very friendly... His coaching was amazing.. 😊"

— **Jesintha Lobo, Associate at Honeywell**

"Very good at excel, a good working and teaching skills. The way he express his thoughts is beautiful."

— **Nishanth, CA Finalist**

"The time I had spent with sir was not a waste . He was very patient in teaching whenever I had doubts he used to clear my doubts without any argument. His approach towards student was very friendly."

— **Noel Pratik hasda, Working Professional**

"I am very thankful to my sir for his excellent training in Advanced Excel and VBA. His teaching style is clear, practical, and easy to understand. He explains every concept with real-time examples, which helped me gain confidence and improve my skills. I truly appreciate his patience, guidance, and support throughout the training. Highly recommended trainer!"

— **Shaik Tazeem, CMA Student**

I recently joined Excel Wizard's training, and I am really happy with my experience. The way everything is taught is so easy to understand, even for beginners like me. Each topic is shown step-by-step, with real examples, and all my doubts are cleared with patience. I especially liked how the trainer uses simple language—no confusing words, so anyone can follow along! What makes this class different is that it doesn't just cover boring theory. We get to practice a lot, do small projects, and use tricks that actually help in real life and at work. The sessions are interactive, and the trainer motivates everyone to ask questions and try new things in Excel. I learned not just formulas but also shortcuts, data analysis, and how to save time with Excel tools. The best part? The trainer is very friendly, always caring about every student, and quick to reply to our doubts—whether in class or after. I now feel much more confident using Excel, and I can already see the difference in my work. If anyone wants to really learn Excel in a useful, practical way, I would totally recommend Excel Wizard's training."

— **CA Soumya Nair, Chartered Accountant**

"Professional trainer with good subject knowledge and easily convey the concepts."

— **Chethan PN, MBA**

Closing Note

- I believe good training should make people feel confident, not overwhelmed. My goal is to help learners work better, save time, and trust their skills.

Excel Wizardd is built on that belief.
