

Why Choose Training on Oracle?

**Expand your product knowledge and validate your expertise
to give yourself an edge in the job market.**

With training or certification on Oracle Database will:

- Make you a better technologist by **deep diving** into effective database administration techniques.
- **Increase your value** to current and future employers.
- Promote your current **job's stability**; with a new set of in demand skills, you'll also widen your career prospects.

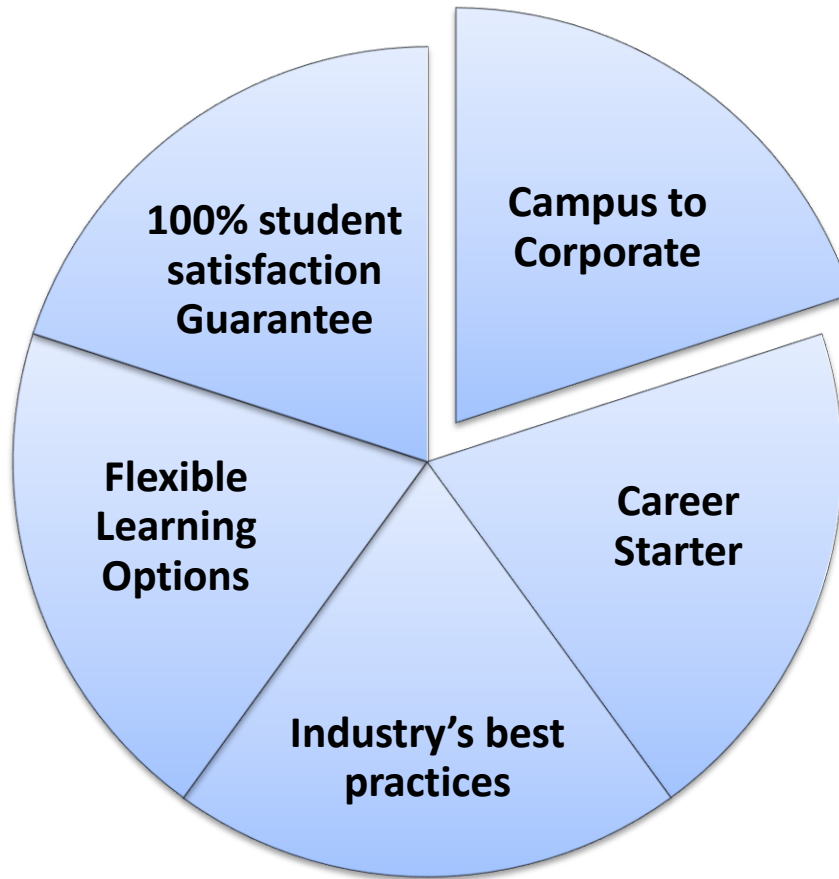

5 Reasons to Enroll in Oracle Training or Certification

For professionals

5 Reasons to Enroll in Oracle Training or Certification

For students

Training/Certification on Oracle Database:

- Our curriculum is developed to teach you skills that directly align with real-life IT jobs.
- Expert Oracle instructors will reinforce topics with structured hands-on practices that will prepare you for the corresponding Oracle Certified Associate exam.
- Also keep you up with the industries best practices.

Feel Confident about Your Investment with Our 100% Satisfaction Guarantee

If you are not completely satisfied with your training experience, you may re-take the same class for free.

- Only 1% of our students requested a re-take of their class.
- In our evaluation surveys, more than 99% of students who completed our courses gave Oracle training their highest recommendation. * .
- 99% would recommend Oracle training to others.

Oracle Database 11g: Database Administrator - Learning Path

The Oracle Database 11g :Administrator learning path is designed to provide an effective curriculum plan for database administrators who are **new to the role**. You learn the skills and knowledge to **install, configure, and maintain the database**. Once you learn the essentials of administering a database, you can develop advanced knowledge in any of **the focus areas**.

Whether you attend recommended courses for a focus area, select advanced DBA topics from multiple focus areas, or plan to pursue an Oracle Database 11g Certification, the Oracle curriculum for Oracle Database 11g are created to meet today's DBA challenges.

Oracle Database 11g: Administration Workshop I Release 2

Oracle Database 11g: Administration Workshop I Release 2

This Oracle Database 11g: Administration Workshop I Release 2 course explores the fundamentals of basic database administration. Expert Oracle instructors will reinforce topics with structured hands-on practices that will prepare you for the **corresponding Oracle Certified Associate exam**.

Benefits to You

Ensure fast, reliable, secure and easy to manage performance. Optimize database workloads, lower IT costs and deliver a higher quality of service by enabling smooth and rapid consolidation within your Datacenter.

Create an Operational Database

You will also learn how to create an operational database and properly manage the various structures in an effective and efficient manner. This includes performance monitoring, database security, user management and backup/recovery techniques.

Training Requirements

This Oracle Database 11g: Administration Workshop I Release 2 course fulfills the training requirement for an Oracle Certification Path. Only instructor-led online (LVC, LWC), in-class (ILT) or Training On Demand courses fulfill the requirement. Please note that Self-Study Courses do not fulfill the training requirement.

Audience

- Database Administrators
- Technical Administrator
- Support Engineer
- Technical Consultant
- Java Developers
- Students (IT/Non IT)

Profile

Before you begin this course, you should have the following qualifications:

- **Oracle SQL Expert certified or,**
- Working experience with **SQL.**

Course objectives

- Install Oracle Grid Infrastructure
- Install and configure Oracle Database 11g
- Configure Oracle Net services
- Monitor and administer undo data
- Manage the database storage structures
- Create and administer user accounts
- Perform basic backup and recovery of a database
- Manage data concurrency
- Monitor performance
- Describe Oracle Database Architecture

How This Course Is Organized

Oracle Database 11g: Administration Workshop I is an instructor-led course featuring lecture and hands-on exercises. Online demonstrations and written practice sessions reinforce the concepts and skills introduced.

Suggested Next Courses

Oracle Database 11g: Administration Workshop II

Work Shop I Course Content

1. Introduction.
2. Installing the Oracle Database Software
3. Creating an Oracle Database
4. Managing the Oracle Instance
5. Managing Database Storage Structures
6. Administering User Security
7. Managing Schema Objects
8. Managing Data and concurrency
9. Managing Undo Data
10. Implementing Oracle Database Security
11. Configuring the Oracle Network Environment
12. Proactive Maintenance
13. Performance Management
14. Backup and Recovery Concepts
15. Performing Database Backups
16. Performing Database Recovery
17. Performing Flashback
18. Moving Data

After finishing the **Oracle Administration Course I**,

The candidate will be able to take the **Oracle Certified Associate (OCA)** certification.

Oracle Database 11g: Administration Workshop II release 2

Profile

Before you begin this course, you should have the following qualifications:

- **Oracle SQL Expert certified or,**
- Working experience with **SQL**
- Oracle Database 11g: **Administration Workshop I.**

Work Shop II Course Content

1. Introduction
2. Configuring Recovery Manager
3. Using Recovery Manager
4. Recovering from Noncritical Losses
5. Database Recovery
6. Flashback
7. Dealing with Database Corruption
8. Monitoring and Managing Memory
9. Automatic Performance Management
10. Managing Schema Objects
11. Managing Storage
12. Automatic Storage management
13. Managing Resources
14. Automating Tasks with the Scheduler
15. Database Security
16. Using Globalization Support
17. Workshop

After finishing the **Oracle Administration Course II**,

The candidate will be able to take up the **Oracle Certified Professional (OCP)** certification.

Oracle Database 11g Certification

The process of obtaining **Oracle Database Certifications** broadens your knowledge and skills by exposing you to an array of important database features, functions and tasks. Through your exam preparation, which includes labs, study and practice, you'll learn how to perform complex, hands-on activities to build your database skill set.

- Oracle Database 11g Administrator Certified Associate (OCA)
- Oracle Database 11g Administrator Certified Professional (OCP)
- Oracle Database 11g Administrator Certified Master (OCM)
