FIND THE GENIUS IN YOUR CHILD

Dermatoglyphics Multiple Intelligence Test

A scientific study of fingerprint patterns that help in understanding an individual's potentials and personality. Since each person's fingerprints are unique, we can understand one's innate potential, personality, and preferences by analyzing the dermatoglyphic patterns. The DMI test helps parents to identify child's potential at an early age and provide guidance to help expand their potentials and scale greater heights.

DMIT REVEALS THE FOLLOWING

- Recommended Profession
- The 8 Multiple Intelligences
- Behavioral Traits
- Brain Lobe Strengths
- Activities Based On MI
- Conversational Style
- Split MI Reading
