# Learn .NET MVC with WCF & Angular

This syllabus is cover all the basic to advance topics of MVC,WCF,ORM & Angular

## **Table of Contents**

1. Module1 .NET Basic	
2. Module2 ORM	
	•••••
4. Module4 MVC	

## Don't be bookish be practical

### **Module 1 Basic .NET**

### Topic 1 - .NET Architecture

- .NET Introduction
- CLR, Base Classes and Garbage Collector
- CLS, CTS and Generation of Garbage Collector
- ILDASM, manifest, metadata
- Assembly types-Private, public

#### Topic2 - C# Language

- Variable, constant and keyword, namespace
- Casting and First C# Program
- Control Statement-if, switch
- Loops-for, foreach and array

#### Topic 3 - OOPS

- Class, object, Access modifier and abstraction
- Property with Encapsulation
- Constructor and Constructor overloading
- Property with Constructor
- Function and Function Overloading
- Static Members and Static class
- Value type and Reference type and Boxing
- Inheritance & Polymorphism, Function Overriding
- Type of classes-simple, sealed and abstract class
- Interface
- Delegate and Multicast Delegate
- Events
- Partial class and StringBuilder

## Don't be bookish be practical

Call-9930178430 www.codingfaactory.org

## Module 2 ORM Object Relational Mapping

#### Topic 1 - Generics

- Generic collection- List<T>,Dictionary<T,T>
- Generic class
- Generic Methods

### **Topic 2 - LINQ [Language Integrated Query]**

- What is LINQ? Why LINQ?
- Advantage & disadvantage of LINQ
- Restriction Operator-Where
- Projection Operator-Select, SelectMany
- var keyword, Anonymous Type
- Partition Operator-Skip, Take
- Element Operator- First, FirstOrDefault, Last, LastOrDefault, Single, SingleOrDefault, ElementAt
- Ordering Operator-OrderBy, OrderByDescending
- Join Operator- Join [Inner and Outer]
- Conversion Operator- Cast, ToList, ToArray, ToDictionary
- Deferred and immediate execution
- Lazy/deferred and eager loading
- Extension Method
- Best practices to improve LINQ performance

### Topic 3 - Enity Framework 6

- What is Entity Framework and ORM?
- Why entity framework?
- History of EF
- Creating Visual and Code Models from Existing Databases
  - o Using EF to Interact with Your Data
  - Inserting Objects
  - Querying Simple Objects
  - Updating Modified Objects
  - o Retrieving Data with the Find and SqlQuery Methods
  - Deleting Simple Objects

### Don't be bookish be practical

Call-9930178430

- Inserting Related Data
- Loading Related Data
- Projection Queries
- Creating a Code Based Model and Database
  - Creating an Entity Framework Model
  - Validating Your EF Model
  - Fixing How EF Interprets Your Model
  - Using Code First Migrations to Create a Database
  - Migrating a Database When Your Model Changes
- How StoreProcedure work in Entity Framework
- IQuerable verses IEnumerable verses IList verses var
- Difference between LINQ and StoreProcedure

## Module 3 SOA-Service Oriented Architecture & REST-Representational State Transfer

### **Topic 1- WCF-Windows Communication Foundation**

- Introduction of SOA
- WCF Architecture
- Binding, Endpoint and Contract
- WCF Hosting using Self hosting
- WCF Hosting using IIS hosting
- DataContract & MessageContract
- Host service on Multiple Endpoints
- Consuming Service Using Proxy
- Consuming Service Using Channel Factory
- WCF Channel-OneWay,Request-Reply,Duplex
- Exception Handling Using FaultContract
- Instance management
- Session management
- Transaction management
- Concurrency management
- Security WCF Authentication & Authorization

### **Module 4MVC**

### **Topic 1-ASP.NET MVC 5**

- What is MVC and ASP.NET
- Routing Mechanism
- ASP.NET MVC Pipeline
- Understand ViewBag, ViewData, TempData & session
- Attribute Routing
- Introduction to Razor engine
- Html Helpers
  - o Inline Html helper
  - Built in Html helper
    - Standard
    - Strongly type
- Understand Model layer
- Model Validation- Client Side and Server Side
- Apply styles
- Layout , Section and ViewStart
- CRUD using Entity Framework
- Passing Form Data using UpdateModel and ModelBinder
- Implement Ajax in MVC
- Implement JQuery in MVC
- Bundling & Minification
- Partial Views
- ActionResultJasonResult
  - JSONResult
  - ViewResult
  - o PartialViewResult
  - FileResult
- MVC Filters
  - Authenticate
  - Authorize
  - Action
  - o Result
  - Exception
- Custom Form Authentication & Authorization in MVC
- Areas
- Caching
- Create Unit Test
- Deployment

## Don't be bookish be practical

Call-9930178430

www.codingfaactory.org

### **Topic 2-** Dependency Injection & Design pattern

- Implement Dependency Injection in MVC
- Implement Repository pattern in EF & MVC
- Implement Unit Of Work pattern in EF & MVC

### **Topic 3-ASP.NET Web API-2**

- Introduction to REST
- History of Asp.Net Web API
- Fundamentals of ASP.NET Web API
- CRUD Operations Using Web API
- Securing Web API
- Hosting Web API

### **Topic 4-Angular JS**

- A Brief History of Angular
- Advantages of Angular
- Clientside Development with .NET
- File Organization
- Understanding Modules
- Organizing Modules
- Naming Overview
- Namespacing
- Naming Objects
- Creating an Angular View inside and MVC View
- Using Angular Inside MVC Layouts
- Bootstrapping Data in Angular Views
- Mini SPA Introduction
- Creating a Mini SPA Inside an MVC View Part 1
- Getting Ready for Production

#### **Topic 5-Bootstrap**

- Introduction to Bootstrap
- Quick Styles after Dark
- Our First Web Page
- Scripts and Styles
- Core Concepts
- Layout with Bootstrap
- Grid Layouts
- Simple Layout, Fixed Grids, Fluid Grids
- Responsive Design

## Don't be bookish be practical

Call-9930178430

- Responsive Utilities
- Typography
- Tables, Forms, Buttons
- Images and Icons
- Bootstrap Components
- Dropdown Menus, Buttons with Menus
- Tabs and Pills, Navbar
