

# American Spoken English

One-on-One Individual Coaching in the English Language  
Provided by Miles H. Whitney

[www.AxeMyAccent.com](http://www.AxeMyAccent.com)

**BUILD STRONG  
COMMUNICATION  
SKILLS**

**LEARN  
THE AMERICAN  
ACCENT**

**UNDERSTAND  
THE SLANG  
& PHRASES**

## About the Program:

Poor communication is one of the most frustrating things that people experience. Unfortunately, it happens almost daily for many people. I have witnessed too many people who were not native English speakers struggle when speaking or working with Americans, Australians and people from the U.K. I could feel their frustration. And that is why I created this program.

This program is designed to teach you the following communication skills:

- Develop your English skills to an advanced level and beyond
- Learn to clearly understand the American Accent
- Learn to speak in a neutral accent that Americans, Australians and Europeans can easily understand
- Learn the slang & phrases commonly used by English speakers
- Develop confidence in your speaking abilities

When you learn these communication skills, you will be able to:

- Apply for jobs with American and multi-national companies
- Easily communicate over the phone and in person
- Be seen as a leader
- Have more credibility when working with multi-national teams

American English is the language of today's economy and business world. When you learn American English, you truly master the English language.

In this program, I work with people one-on-one. It's not an open class. All of my attention is given to you, to work on your individual needs. This specialized attention will bring you results that you can't get from going to a large class with 30+ students in it. *This program will get you results.*

*This program is for serious professionals.  
Are you one of them?*

## American Spoken English program outline:

Coaching sessions are provided in 6-session packages. Each session lasts for 50 minutes. These one-on-one sessions are customized for each student. This is a typical 6-session package.
