

Contents

chapter 1:Architecture

- Oracle Database Architecture
- Database Structures
- Oracle Memory Structures
- Process Structures
- Oracle Instance Management
- Server Process and Database Buffer Cache
- Physical Database Structure
- Tablespaces and Data Files
- SYSTEM and SYSAUX Tablespaces
- Segments, Extents, and Blocks
- Logical and Physical Database Structures

chapter 2: Installing the Oracle Database Software

chapter 3: Creating an Oracle Database

- Database Configuration Assistant (DBCA)
- Using the DBCA to Delete a Database
- MANUAL CREATION OF DATABASE

chapter 4: Managing the Oracle Instance

- Starting and Stopping Database Control
- Oracle Enterprise Manager
- Accessing Oracle Enterprise Manager
- Database Home Page
- Setting Up iSQL*Plus for SYSDBA and SYSOPER Access
- Calling SQL*Plus from a Shell Script
- Calling a SQL Script from SQL*Plus
- Initialization Parameter Files
- Simplified Initialization Parameters

Viewing and Modifying Initialization Parameters
Database Startup and Shutdown
Starting Up an Oracle Database Instance
Starting Up an Oracle Database Instance: NOMOUNT
Starting Up an Oracle Database Instance: MOUNT
Starting Up an Oracle Database Instance: OPEN
Shutting Down an Oracle Database Instance
Shutdown Modes
SHUTDOWN Options
Using SQL*Plus to Start Up and Shut Down
Viewing the Alert Log
Dynamic Performance Views

chapter 5: Managing Database Storage Structures

Storage Structures
How Table Data Is Stored
Anatomy of a Database Block
Tablespaces and Data Files
Oracle Managed Files (OMF)
Space Management in Tablespaces
Exploring the Storage Structure
Creating a New Tablespace
Storage for Locally Managed Tablespaces
Tablespaces in the Preconfigured Database
Altering a Tablespace
Actions with Tablespaces
Dropping Tablespaces
Viewing Tablespace Information
Gathering Storage Information
Viewing Tablespace Contents
Enlarging the Database

chapter 6: UNDO TABLESPACE, TEMPORARY TABLESPACE, PASSWORD FILE

Undo Data
Transactions and Undo Data

- Storing Undo Information
- Undo Data Versus Redo Data
- Monitoring Undo
- Administering Undo
- Configuring Undo Retention
- Guaranteeing Undo Retention
- Sizing the Undo Tablespace
- Using the Undo Advisor
- Temporary tablespace

chapter 7: Implementing Oracle Database Security(AUDITING)

- Industry Security Requirements
- Separation of Responsibilities
- Database Security
- Principle of Least Privilege
- Applying the Principle of Least Privilege
- Monitoring for Suspicious Activity
- Standard Database Auditing
- Enabling Auditing
- Uniform Audit Trails
- Enterprise Manager Audit Page
- Specifying Audit Options
- Using and Maintaining Audit Information
- Value-Based Auditing
- Fine-Grained Auditing
- FGA Policy
- FGA Guidelines
- DBA Auditing
- Maintaining the Audit Trail

chapter 8: Configuring the Oracle Network Environment(LISTENERS)

- Oracle Net Services
- Oracle Net Listener
- Establishing Net Connections
- Establishing a Connection
- User Sessions

Tools for Configuring and Managing the Oracle Network

- Listener Control Utility
- Listener Control Utility Syntax
- Listener Home Page
- Net Services Administration Pages
- Creating a Listener
- Adding Listener Addresses
- Database Service Registration
- Naming Methods
- Easy Connect
- Local Naming
- Directory Naming
- External Naming Method
- Configuring Service Aliases
- Advanced Connection Options
- Testing Oracle Net Connectivity

chapter 9: Proactive Maintenance(AWR ADDM)

- Objectives
- Proactive Maintenance
- Introducing Terminology
- Optimizer Statistics
- Using the Manage Optimizer Statistics Page
- Automatic Workload Repository (AWR)
- AWR Infrastructure
- AWR Snapshot Sets
- Enterprise Manager and AWR
- Managing the AWR
- Statistic Levels
- Automatic Database Diagnostic Monitor (ADDM)
- ADDM Findings
- ADDM Recommendations
- Advisory Framework
- Enterprise Manager and Advisors
- The DBMS_ADVISOR Package

chapter 10: Redolog files and control files

Control Files
Backing Up the Control File to a Trace File
Redo Log Files
Multiplexing the Redo Log
Archive Log Files
Archive Log File: Naming and Destinations
ARCHIVELOG Mode

chapter 11 : Performing Flashback

Flashback Technology

- 1) flashback drop
- 2) flashback table
- 3) flashback query
- 4) flashback version query
- 5) flashback transaction query
- 6) Flashback Database

chapter 12 INTRODUCTION OF BACKUP

cold backup

hot backup

logical backup

- 1) export
- 2) import
- 3) expdp
- 4) impdp

DBLINKS AND MATERIALIZED VIEWS

chapter 13: Configuring Recovery Manager Objectives

Backup and Recovery: Review

Features of Recovery Manager

Recovery Manager Components

Steps for Configuring RMAN 2-8

RMAN Repository Data Storage: Comparison of Options

Backup Destinations

Media Management

Using a Flash Recovery Area with RMAN

Monitoring the Flash Recovery Area with EM

Flash Recovery Area Space Usage

V\$FLASH_RECOVERY_AREA_USAGE

Backing Up the Flash Recovery Area

Setting Parameters That Affect RMAN

Configuring Persistent Settings for RMAN

Configuring RMAN Settings by Using EM

Control File Autobackups

Retention Policies

Managing Persistent Settings Channel Allocation

Automatic and Manual Channel Allocation

Channel Control Options

chapter 14: Using Recovery Manager Objectives 3-2

Issuing Recovery Manager Commands

Types of RMAN Commands

Job Commands: Example

RMAN Commands: Overview

BACKUP Command

Backup Constraints

Parallelization of Backup Sets

Compressed Backups

Image Copy

Tags for Backups and Image Copies

BACKUP Command Options

Backing Up Archived Redo Logs

Whole Database Backup

RMAN Backup Types

Differential Versus Cumulative

Block Change Tracking

Enabling Block Change Tracking

Incrementally Updating Backups

LIST Command

REPORT Command

REPORT NEED BACKUP Command
REPORT NEED BACKUP: Examples
REPORT OBSOLETE and DELETE OBSOLETE

chapter 15: Database Recovery

Recovery Methods

User-Managed Recovery: RECOVER Command
RMAN Recovery: RESTORE and RECOVER Commands
Recovery Using Enterprise Manager
Complete Versus Incomplete Recovery
Complete Recovery Process
Incomplete Recovery Process
Situations Requiring Incomplete Recovery
Types of Incomplete Recovery
Performing User-Managed Incomplete Recovery
User-Managed Time-Based Recovery: Example
User-Managed Cancel-Based Recovery: Performing Incomplete Recovery by Using RMAN
Time-Based Recovery Using RMAN: Example
Log Sequence Recovery Restore Points

chapter 16 : Flashback Objectives

Flashback Database: Review
Flashback Database Architecture
Configuring Flashback Database
Configuring Flashback Database Using EM
Flashback Database: Examples
Performing Flashback Database Database Considerations
Monitoring Flashback Database
Monitoring Flashback Database with EM
Guaranteed Restore Points 6-28

chapter 17 : Dealing with Database Corruption

What Is Block Corruption?
Block Corruption Symptoms: ORA-01578
How to Handle Corruption
Corruption-Related Features
DBVERIFY Utility 7-8
Interpreting DBVERIFY Output
ANALYZE Command
Verifying Block Integrity in Real Time: DB_BLOCK_CHECKING
Verifying Block Integrity in Real Time: DB_BLOCK_CHECKSUM
Using EXP to Detect Corruption
Using Flashback for Logical Corruption
DBMS_REPAIR Package
Using DBMS_REPAIR
Block Media Recovery (BMR)
BLOCKRECOVER Command
Examples of Using BLOCKRECOVER

chapter 18 : Monitoring and Managing Memory Objectives 8-2

Automatic Shared Memory Management: Overview
Benefits of Automatic Shared Memory Management
How ASMM Works
Configuring ASMM by Using Database Control
Manually Configuring ASMM
Behavior of Autotuned SGA Parameters
Modifying the SGA_TARGET Parameter
Disabling ASMM
Manually Resizing Dynamic SGA Parameters
Program Global Area (PGA)
Automatic PGA Memory Management

chapter 19: Table partitions and Transportable tablespaces

What Is a Partition and Why Use It?

Partitions

Creating a Partition

Partitioning Methods

Partition Maintenance

Index-Organized Tables

Index-Organized Tables and Heap Tables

Creating Index-Organized Tables

Results of Shrink Operation

Space Reclamation with ASSM

Database Control and Segment Shrink

Shrinking Segments by Using SQL

Managing Resumable Space Allocation Transporting Databases

chapter 20 : Automatic Storage Management (ASM)

chapter 21: dataguard

chapter 22: patching and upgradation
