

I am SAURAV SAHU, a student of 2-year regular program at SCHOLARS ACADEMY. When I was searching for coaching in beginning of my class XI, I was utterly confused with many brands and the so-called talked-about coaching institute. At that time, me and my parents who didn't have a technical know-how for IITJEE took the decision of joining SCHOLARS ACADEMY, whereas my other friends joined other branded institutes which are hyped and overpraised results. Today when result is declared I can see things very clearly that even though my friends who were most intelligent were left out. In my perception, they lacked the scholar's perfection. The way of working in Scholars academy is absolutely different. Here teachers concentrate on each and every student instead of attending just a few. "No" is never found here, it's always a welcome for doubt removal, group studies, motivation classes & that is why I see every other student of my batch clearing IIT-JEE. I will say that I had good fate to study from highly qualified teachers like Sudhanshu sir, Vipkava sir, Akash sir and others which were not just merely teachers but were Gurus for me. I just can't imagine missing any of their classes. They never felt unapproachable to us. Another important aspect in classes were the 3-D visualisation approach through multimedia projectors which made Chemistry and Physics became such an easy nut to crack. I personally feel that in today's tough competition one needs to have a "coach" than to have a mere teacher & Sudhanshu sir ensured that every child got the best of what he should get. I am highly obliged to Scholars Academy and Sudhanshu sir whose presence was indispensable for this journey. I would recommend Scholars Academy two-year program for all aspirants who are serious and aspire to clear IIT.
