

I am Tarun Bhai, a student of one year programme of Scholar's Academy. In the beginning when I had passed class X, I did not know much about IIT. So I have not started preparation for it. I partially lost my first year. But through communication in my school I heard about Scholar's Academy. Some of my friends told me about it. ~~I~~ I reached Scholar's Academy and they informed me about their one year programme. I decided to take admission. And it was great to see my improvement in few days. All the teachers of this institute take care of each and every student, and solve every doubt and teach very nicely and in a well sequenced manner. They first cleared my class XI concept and build me up for the difficult one. All the teachers explained every thing in a soothing way, and helped me in CBSE also. Regular tests were conducted and proper marksheet was given to me and they also helped me in analysing the results. It helped me to improve and they ^{had} also encouraged me about IIT. They took out my fear about IIT. At last I ~~was~~ say that it would be best to join Scholar's Academy. Instead of joining ~~at~~ some high brand named institute.
