History of writing

In the ancient days, communications were initiated in verbal form. Cultures adapting rituals and stories passing from one to another generation became the mode of retaining history. Written communication came into existence in the form of simple drawings that became pictorial inscriptions.

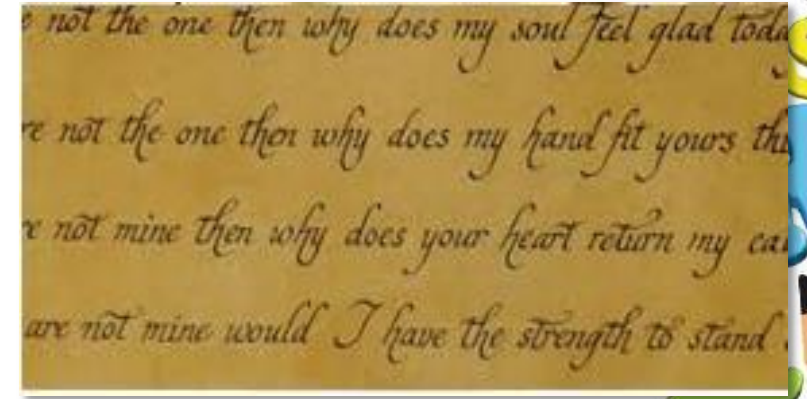

Different symbols got developed in different cultural communities which are used to interact with each other. The human beings started to write some 8000 years ago, in the form of symbols. This over centuries developed into a set pattern, which generally came to be known as “language”.

Development of modern writing

The use of ink is one of the greatest inventions that accelerated the development of modern written communication. By 600 A.D. Roman script came into existence and was widely accepted in both lower and upper cases. The space between words was also added to enhance readability.

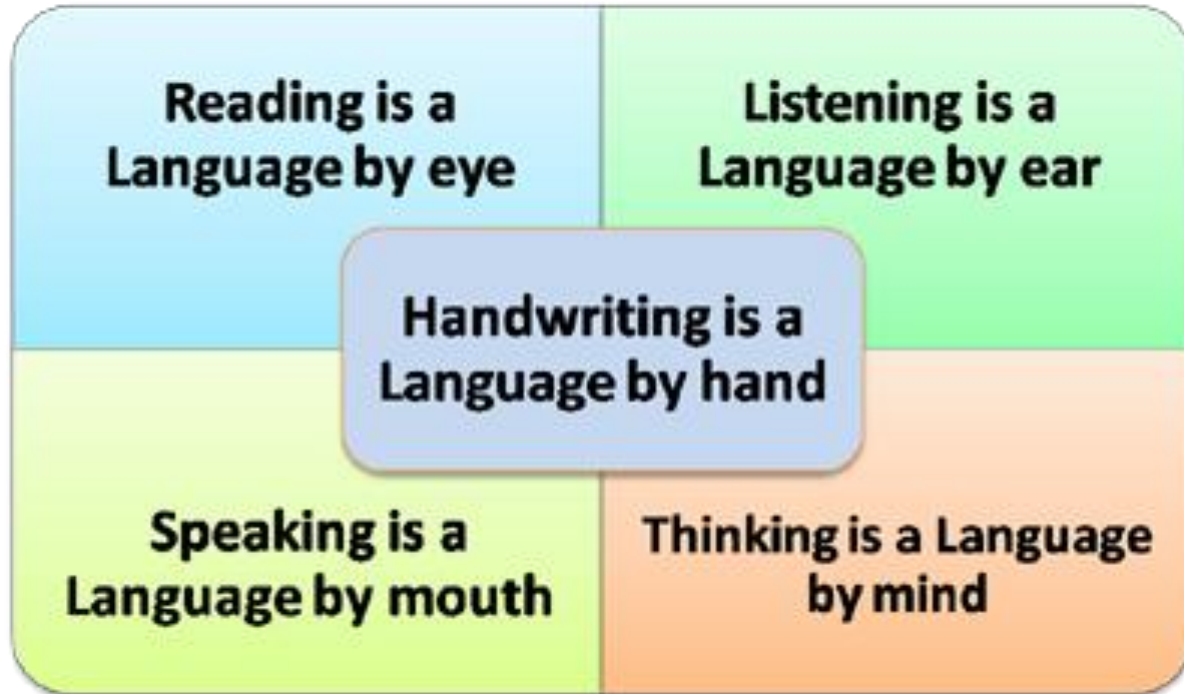

Now we have computers, why worry about handwriting?

The initial learning, academic success and overall student confidence is directly related to handwriting. Scientific tests conducted have re-established the role of handwriting in activating a large section of the brain

Hands have unique relationship with the brain when it comes to composing thoughts and ideas. Writing also provides a means to practice hand-eye co-ordination and fine motor skills, and some experts even suggest a link between handwriting and learning ability.

Handwriting is a language that reflects your personality

**Handwriting is the mirror
of
the state of
“The mind of the writer”
&
“The personality”**

Kapil

Very beautiful handwriting,
even when he writes fast

Rohit

Handwriting is not so good,
With speed becomes very
illegible

ST
Who will
score high
in Exams?

“This is Rohit. he is frustrated. He is frustrated because, despite being intelligent and knowing what he wants to say, he just cannot get it down on the paper the way it should look and so that others can read it. Rohit has difficulties with handwriting... and he is not alone”.

How important are the academic scores?

How important is the percentage of marks scored by your child in academics?

What do you do to ensure better percentage by your child?

In this competitive age, will an increase of 5 to 10% marks matter in child's academics?

Value of $\frac{1}{2}$

To realize the value of ONE YEAR, ask a student who failed a grade.

To realize the value of ONE MONTH, ask a mother who gave birth to a premature baby.

To realize the value of ONE WEEK, ask the editor of a weekly newspaper.

To realize the value of ONE HOUR, ask the lovers who are waiting to meet.

To realize the value of ONE MINUTE, ask a person who missed the train.

To realize the value of ONE SECOND, ask a person who just avoided an accident.

To realize the value of ONE MILLISECOND, ask the person who won a silver medal in the Olympics.

To realize the value of $\frac{1}{2}$, ask the student who failed in competitive exam

Illegible handwriting has several negative effects on the child.

It affects

- 👎 Listening ability
- 👎 Body language
- 👎 Performance in academics
- 👎 Verbal communication
- 👎 Confidence
- 👎 Personality

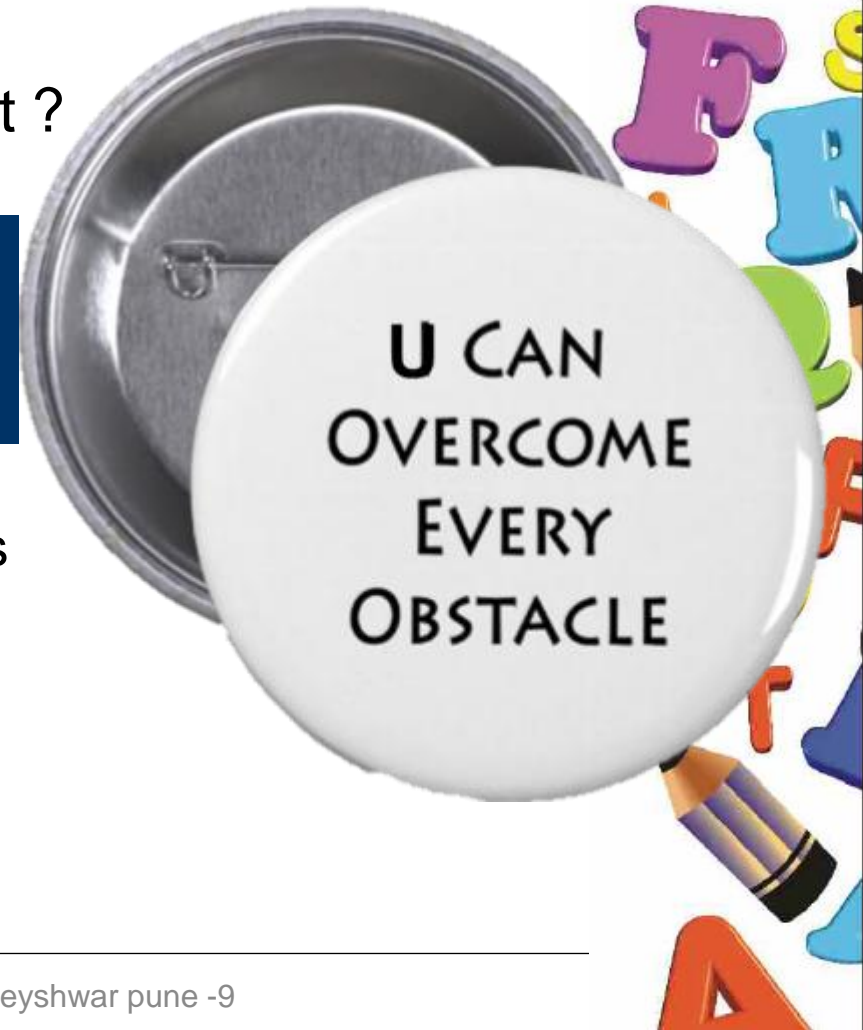

Overcome the obstacles

Why do we neglect handwriting when it is so important ?

Are you not aware that the quality and speed of handwriting can be improved if worked upon scientifically?

We have developed a program after research of over 16 years through which handwriting of any individual can be improved

Writing has science involved in it..

When you think to write something

Your brain forms shapes – the letters

Letters added to make words

Words into sentence by brain

Brain gives instruction to hand

Hand picks a pen & write

This is called MOTOR action. To write and to write quality content you require excellent MIND and MOTOR coordination.

Write Here
There are so many things that have been written about handwriting and its effect on a person as a student and later as a professional. But yet it seems logical for us to understand the larger picture that handwriting portrays in a life of human being. With the birth of each human being, starts the history of handwriting and we believe that every human being has contributed through decades to improve the understanding about the execution of writing skills through correct creation and joining of letters. With the start of a student's education, they are trained into the skills of handwriting. In the higher education they understand the importance of legible writing as their handwriting skills affect their grades.

Day 1

There lived a farmer in a village. He wanted to teach a lesson to his son about unity. One day he calls them and give them a bundle of sticks and asked them to break it. Four of them tried their ~~best~~ level best but could not break it. Then he ~~gives~~ gives them a single stick, four of them broke the stick. Then the father told them that this proves that 'UNITED WE STAND AND DIVIDED WE FALL'.

Day 7
