MongoDB as a Demanding Carrier Skill

- MongoDB is the leading NoSQL Database in the Gartner's chart.

- High scalable database used by many ecommerce companies as database for their website like snapdeal, Expedia and many others.

- Database for the real time analytics, used in many IOT companies like Bosch.

- More deployment from any other NoSQL database like Cassandra , AmazonDB.

- ETL and dataware house perfect choice for Big Data.

- Many Hadoop deployments are using MongoDB as a database in place of Hive
