

Modus Operandi

In today's high-interaction business world, we understand the importance of the conversational aspect - listening and speaking and have designed our modules around the same.

LE's teaching methodology incorporates Audio Visual aid, which is in sync with LE's module books; created by LE's in-house team of experts in linguistics. The language training content & exercises are customised according to the level of the students. Activities are carried out on daily basis to assist the students in building up their confidence levels and practice conversing with other students from different countries and backgrounds. At LE, we create an interactive environment that supports fun learning and encourages every student, Indian or Foreign nationals, to speak the language.

EXPERIENTIAL LEARNING

Linguaa Encarta's signature step of Language Learning, this style of learning had given us accolades from participants and from language experts too.

Its the most effective manner of making the learning more efficient and productive as it allows the acquired knowledge to be applied in order to make it go to an advanced level of skill.

Don't be surprised that your couple of sessions may be outdoors where in you put the gained knowledge to its effective use though our path breaking and pioneering approach of Experiential Learning !!

Some of the key features of our training methodology:

- role plays
- group discussions
- role plays
- audio-video clippings
- handouts
- games and activities
