

I, Gaurav Kumar have successfully organized two days' Computer Awareness Workshop (Problem Oriented Workshop) held on 16th & 17th January, 2015 under the banner of JNU Forum for Mutual Learning in association with National Service Scheme in Central Library of University to aware the students about the usage of computer and its importance in our daily life. More than 110 students participated each day in the workshop and updated their skills of using computers and its application in real world life. In this workshop, students learnt about computer, operating system, ms-office, internet & its usage, cyber security and mobile security. During the workshop, many students cleared their doubts of using computer and its application in writing term paper, research paper, resume & best presentation design. At the end, many of students are satisfied with the knowledge which were shared in the workshop and demanded to repeat this workshop on regular basis. This report is published in Monthly Magazine of JNU (Snapshot are shown here).

Computer Awareness Workshop

workshop was to make the students aware of the usage of computers and of the importance of computers in every day life. More than 110 students participated in the workshop and updated their skills. In this workshop, students learnt about computers, operating systems, MS-office, internet, cyber security and mobile security. During the workshop, many students cleared their doubts regarding usage of computers and computer applications, especially with regard to writing term papers, research papers, resumé & design. Many students were satisfied with the knowledge they acquired and requested that this workshop be held at regular intervals..

A two day Computer Awareness Workshop (Problem Oriented Workshop) was organized on 16 – 17 January, 2015 by JNU Forum for Mutual Learning in association with the National Service Scheme in the JNU Central Library. The aim of this
