

I am an experienced Maths tutor taking classes for a long time. I have got 20years of teaching experience. I did M.Sc (Mathematics) form Osmania University , Hyderabad.

I take Maths tuitions online and offline.

My way of teaching is first teaching the concepts clearly for the students then they can do the problems very easily. I also give easy way to solve the problems. I teach the tips and tricks for the students.

All the students who comes to me are all happy that they are able to learn the concepts clearly and confidently can do the problems.

There are so many students for me in my career who are now well settled and working in MNCs now. What else to say more than this.....
