ADO.NET   Duration:20 Hours

Source	Topic/Activity Name
Chapter 1	Rationale
	Prerequisites
	Case Study-Tebisco
	Objectives
	Understanding ADO.NET
	The ADO.NET Object Model
	Features of ADO.NET
	Creating and Managing Connections
	Creating a Connection Object
	Creating a Command Object
	Opening the Connection Object
	Executing SQL Statements in the Command Object
	Closing the Connection Object
	Implementing Connection Pooling
	Summary

Source	Topic/Activity Name
Chapter 2	Objectives
	Introducing Data Binding
	Simple Data Binding
	Complex Data Binding
	Navigating Between Records
	Dataview and example

Source	Topic/Activity Name
Chapter 3	Objectives
	Introducing Connected and Disconnected Environment
	Working with Command Objects
	Working with Data Adapters
	Summary

All Activities in ADO.NET

Simple Login page Using C#.net?
Simple Window registration Using C#.net
Simple Insert,Delete,Update,Search Data Using C#.net
Counting Number of Rows using C#.net
Providing ascending and descending order using C#.net
