## HTML5 Programming

I

	Week 1
Source	Topic/Activity Name
	Rationale + Intro PPT
	Objectives
	Introducing HTML
	Creating an HTML Web Page
	Text Editor
Chapter 1	Graphic Editor
	Identifying the Basic Structure of an HTML Page
	Exploring the <head> Tag</head>
	Exploring the <head> Tag</head>
	Exploring the <body> Tag</body>
Source .	Summary Topic/Activity Name
Source	
	Objectives
	Exploring the <body> Tag</body>
	Working with Styles
	Identifying the Syntax of CSS
	Identifying the Types of Style Sheets
Chapter 2	Applying Multiple Style Sheets
	Identifying CSS Selectors
	Styling HTML Elements
	Summary
Source	Topic/Activity Name
	Objectives
	Styling HTML Elements
	Grouping and Nesting Styles
	Controlling the Visibility of Elements
	Positioning HTML Elements
	Q&A
	Summary
Source	Topic/Activity Name
	Objectives
	Objectives Applying Transitions, Animations, and Transformations
	Applying Transitions, Animations, and Transformations
	Applying Transitions, Animations, and Transformations Applying Transitions
	Applying Transitions, Animations, and Transformations Applying Transitions Applying Animations
	Applying Transitions, Animations, and Transformations Applying Transitions Applying Animations Applying Transformations
	Applying Transitions, Animations, and Transformations Applying Transitions Applying Animations Applying Transformations Q&A
	Applying Transitions, Animations, and Transformations Applying Transitions Applying Animations Applying Transformations Q&A Creating Tables
Chapter 3	Applying Transitions, Animations, and Transformations Applying Transitions Applying Animations Applying Transformations Q&A Creating Tables Identifying the Basic Structure of a Table
Chapter 3 Source	Applying Transitions, Animations, and Transformations Applying Transitions Applying Animations Applying Transformations Q&A Creating Tables

	Objectives
	Enhancing Tables
	Activity 3.1: Creating a Table
	Accessing Multiple Web Pages Using Frames
	Creating Web Pages Using Frames
	Styling Frames Activity 3.2: Accessing Multiple Web Pages Using Frames
	Activity 3.2: Accessing Multiple web Pages Using Frames
	Summary
	Total Time
Source	Topic/Activity Name
	Objectives
	Understanding Scripting
Chapter 4	Types of Scripting
Chapter 4	Identifying the Benefits of JavaScript
	Implementing JavaScript in Web Pages
	Embedding a Script into a Web Page
	Creating and Using an External File
	Identifying Rules and Conventions Used in JavaScript
	Using Variables, Operators, and Control Structures
	Defining Variables
	Using Operators
	Summary
Source	Topic/Activity Name
Source	Topic/Activity Name Objectives
Source	Objectives
Source	
Source	Objectives Using Conditional Constructs
Source	Objectives Using Conditional Constructs Using Loop Constructs Break and Continue Statements
Source	Objectives Using Conditional Constructs Using Loop Constructs Break and Continue Statements Implementing Functions
Source	Objectives Using Conditional Constructs Using Loop Constructs Break and Continue Statements Implementing Functions Introducing Functions
Source	Objectives Using Conditional Constructs Using Loop Constructs Break and Continue Statements Implementing Functions
Source	Objectives         Using Conditional Constructs         Using Loop Constructs         Break and Continue Statements         Implementing Functions         Introducing Functions         Creating Functions
Source	Objectives         Using Conditional Constructs         Using Loop Constructs         Break and Continue Statements         Implementing Functions         Introducing Functions         Creating Functions         Q&A
Source	Objectives         Using Conditional Constructs         Using Loop Constructs         Break and Continue Statements         Implementing Functions         Introducing Functions         Creating Functions         Q&A         Accessing Functions
	Objectives         Using Conditional Constructs         Using Loop Constructs         Break and Continue Statements         Implementing Functions         Introducing Functions         Creating Functions         Q&A         Accessing Functions         Summary
	Objectives         Using Conditional Constructs         Using Loop Constructs         Break and Continue Statements         Implementing Functions         Introducing Functions         Creating Functions         Q&A         Accessing Functions         Summary         Topic/Activity Name         Objectives
	Objectives         Using Conditional Constructs         Using Loop Constructs         Break and Continue Statements         Implementing Functions         Introducing Functions         Creating Functions         Q&A         Accessing Functions         Summary         Topic/Activity Name         Objectives         Designing an HTML Form
Source	Objectives         Using Conditional Constructs         Using Loop Constructs         Break and Continue Statements         Implementing Functions         Introducing Functions         Creating Functions         Q&A         Accessing Functions         Summary         Topic/Activity Name         Objectives         Designing an HTML Form         Creating Forms
	Objectives         Using Conditional Constructs         Using Loop Constructs         Break and Continue Statements         Implementing Functions         Introducing Functions         Creating Functions         Q&A         Accessing Functions         Summary         Topic/Activity Name         Objectives         Designing an HTML Form         Creating Forms         Exploring Form Elements
Source	Objectives         Using Conditional Constructs         Using Loop Constructs         Break and Continue Statements         Implementing Functions         Introducing Functions         Creating Functions         Q&A         Accessing Functions         Summary <b>Topic/Activity Name</b> Objectives         Designing an HTML Form         Creating Forms         Exploring Form Elements         Manipulating the Components of a Web Page
Source	Objectives         Using Conditional Constructs         Using Loop Constructs         Break and Continue Statements         Implementing Functions         Introducing Functions         Creating Functions         Q&A         Accessing Functions         Summary         Objectives         Designing an HTML Form         Creating Forms         Exploring Form Elements         Manipulating the Components of a Web Page         Working with Browser Objects
Source	Objectives         Using Conditional Constructs         Using Loop Constructs         Break and Continue Statements         Implementing Functions         Introducing Functions         Creating Functions         Q&A         Accessing Functions         Summary         Topic/Activity Name         Objectives         Designing an HTML Form         Creating Forms         Exploring Form Elements         Manipulating the Components of a Web Page         Working with Browser Objects         Summary
Source Chapter 5	Objectives         Using Conditional Constructs         Using Loop Constructs         Break and Continue Statements         Implementing Functions         Introducing Functions         Creating Functions         Q&A         Accessing Functions         Summary         Objectives         Designing an HTML Form         Creating Forms         Exploring Form Elements         Manipulating the Components of a Web Page         Working with Browser Objects         Summary
Source	Objectives         Using Conditional Constructs         Using Loop Constructs         Break and Continue Statements         Implementing Functions         Introducing Functions         Creating Functions         Q&A         Accessing Functions         Summary         Topic/Activity Name         Objectives         Designing an HTML Form         Creating Forms         Exploring Form Elements         Manipulating the Components of a Web Page         Working with Browser Objects         Summary         Total Time         Topic/Activity Name
Source Chapter 5	Objectives         Using Conditional Constructs         Using Loop Constructs         Break and Continue Statements         Implementing Functions         Introducing Functions         Creating Functions         Q&A         Accessing Functions         Summary         Objectives         Designing an HTML Form         Creating Forms         Exploring Form Elements         Manipulating the Components of a Web Page         Working with Browser Objects         Summary

		Working with Form Objects
<b>C</b>		Summary
Source		Topic/Activity Name
Chapter 6		Objectives
		Introducing Canvas
		Creating a Canvas
		Working with Color, Shapes, and Styles
	ter 6	Working with Path, Text, and Images
	Transforming and Animating Canvas Elements	
		Transforming Canvas Elements
		Animating Canvas Elements
-		Summary
Source		Topic/Activity Name
		Objectives
	Exploring jQuery	
	Manipulating HTML Elements by Using jQuery	
	Handling jQuery Events	
		Adding Visual Effects Using jQuery
Chap	tor 7	Implementing Hide Effect
Chap		Implementing Show Effect
		Implementing Toggle Effect
		Implementing Slide Effect
		Summary
		Total Time
Source		Topic/Activity Name
		Objectives
		Implementing Fade Effect
		Implementing Animate Effect
		Activity 7.1: Working with jQuery
		Implementing Image Rollover
		Creating Image Rollover
		Creating Backward Compatible Rollover
		Preloading Images
		Creating Image Gallery
		Using Colorbox Plugin
		Summary
	Source	Topic/Activity Name
		Objectives
		Using galleria Plugin
		Implementing Geolocation
Char	tor 9	Implementing the Geolocation API
Chap	ter ð	Handling Errors
		Implementing Offline Support
		Implementing Client-side Storage
		Implementing Application Cache
		Implementing Application Cache Summary
