

## About the Company:

Aktsii Advisory Services Pvt Ltd is a full-fledged Stock Market Technical Research house, Advisory and Investment Training Academy established by a highly efficient team having technically strong knowledge on Stocks, Shares, Commodities and Currency with an experience of over 22 years.

We proudly introduces you Mr. Bhaskar, our Technical Research Head, with an experience of over 22 years, who has been the strong pillar behind the success of our organization as your tutor, advisor and a guide throughout your stock market investment courses and beyond that.

We, one who believes in a great saying that, “If you have knowledge, let others light their candles in it”, designed a highly informative Investment Courses that would help the investors of different grades ranging from a new comer into the stock market field to the investor with a moderate success rate to put another step forward towards their investment planning goals.

These Courses are for the people who have great interest in gaining knowledge about stock market. We assure you that, the one who takes our investment courses will go out with a different approach towards the market and starts building the passion on it than just interest.

We as an organization, apart from having Technical Research House, providing market calls and advisory as our strong Business Ventures, we also feel that sharing our knowledge with the investors through our investment courses at affordable prices and stand by them throughout their journey of understanding the market better until they start predicting the same on their own as our primary objective.

Our organization has a great experience of conducting seminars all over India on various stock market technical methodologies.

The training would be conducted in 2 sessions through offline as person to person or in group sessions or Online through webinars/seminars. Our training also includes one week of follow up sessions helping our trainees in implementing our techniques.
