CISA (Certified Information Systems Auditor) Course

About CISA Course

The Certified Information Systems Auditor (CISA©), a certification by ISACA©, the leading association in the field of information security, is one of most coveted certification in the industry today. It is a globally recognized and accepted credential, demonstrating that you have appropriate knowledge, expertise and attitude as is required of a competent information security professional.

This is a comprehensive eLearning course for CISA aspirants, who are planning to take CISA Examination in the next 3-5 months. It is based on the latest CISA Review Manual 2013 edition and has 5 interactive modules. It provides learning at your own pace along with Online Classes. Besides practice questions and other activities, there is a practice exam at the end of the course which will enable you to assess your knowledge and understanding of the study material. At the end of this course you will be given tips to appear for the CISA exam!

There is a practice tests at the end of the course, which simulates the actual exam. This will help you in assessing your readiness for the examination.

The CISA course will equip you with various principles, tools & methodologies, which can be employed in the practical world of information security. It will empower you to competently deal with challenges in your work. Finally it will enable you to appear for the CISA exam confidently and successfully.
