Shaping Young Minds

Brain Mapping with Complete Personality Analysis
Career Counselling & Psychotherapy

PREAMBLE:

Be it admission to good schools/colleges or getting selected in good companies post studies, there is intense competition in all fields. There is also intense competition for promotions and riding the ladder of success after getting selected in a good company. Choosing right profession for greater success in life is extremely important; otherwise one can be stuck for life in a profession in which the concerned person has no interest. How do find out what my areas of professional interest are or what are my strengths and weaknesses for professional excellence. Our Brain Mapping with Complete Personality Analysis Career Counselling & Psychotherapy helps you to determine the right career path for you and also offers counseling for complete personality makeover.

AGENDA (what you will learn):

Active Brain training has become very popular tool worldwide about Brain health / Brain fitness. Activating Genius is a Brain exercise training program that helps everybody to increase their learning, and thinking capability. It improves concentration, boosts self-confidence which leads to a brighter academic performance and growth. With the Midbrain Activation Training participants are able to solve the most difficult problems in a simple way. Our courses cover the regular practice schedules for participants under suitable atmosphere under expert guidance. We also provide practice and reference kits to practice in your spare time at your home at no extra cost. It's very easy and you can feel a big difference in your memory power and knowledge level.
