

Street photography

What will I learn?

During the workshop we will cover the following topics:

- ④ **Location:** how to choose a suitable location and find interesting subjects
- ④ **Unique expertise:** what to look for, anticipating the shot, foreseeing, decisive moment
- ④ **Lenses:** the types of lenses and focal lengths you'll need for creative street photography
- ④ **Composition:** how to use existing natural elements to enhance your images

- ④ **Technical skills:** everything you need to know including shutter speed, aperture, ISO and DOF
- ④ **Focusing:** the importance of focus in street photography (automatic, manual, tracking focusing, single focusing, continuous focusing)
- ④ **Motion:** explore motion techniques such as blurring a subject, freezing a subject, panning and time delay
- ④ **Photographing safely in public spaces:** understand the legal, moral and safety aspects involved for working in a public place.
