

**About Us:**

Since all our faculties have Real-time experience, we provide **Quality Training with Real-Time** approach and map Academic knowledge with required Real-Time knowledge. **Leela Soft** offers **Corporate Training** to the entire **Graduate, Post Graduate Students** who want to enhance their skill. We train thoroughly on the **Project Development Standards** by imparting Real-Time knowledge, with core concentration on the concepts of optimization, security, performance and quality Standards.

Target Audience:

This course is specially designed for the **B.Sc(Computers), B.Tech/B.E, M.Tech, M.C.A and all other IT related Graduates and Post Graduate Students** who are interested in learning hottest programming languages current IT industry.

Mission:

Professionalism has conquered the Job scenario and Companies seek for well Qualified, Professional and Skilled manpower. Keeping in view this demand of companies we groom Students in such a way that they will be second to none. Quality Education and IT Sector Oriented Training is our motto.

Live Project Work:

Live Project is the phase when you finally implement most of the things that you have learnt during your Software Training. Software Development is more than just coding. Before you write even a single line of code, it requires careful analysis of the requirements, gathering information, preparing the necessary documentation which requires understanding the live project using Software Development Life Cycle. So you have to learn tricks to produce bulk output on time maintaining the right **Design Quality or Coding Standard**. That is the significance of **Live Project Training**. We assure that our Live Project Training will impart the confidence in Students to work on real time projects.
