

Access Topics	
CHAPTER 1-	What is Database and Relational Database
	Creating a New Database
	Overview of a Database
	Viewing Database Objects in the Navigation Bar
	Opening and Closing Databases
CHAPTER 2-	Creating Relational Database Tables
	The "Flat File" Method of Data Storage
	The Relational Model of Data Storage
	Creating Database
	Creating Relational Database Tables
	Assigning a Primary Key to a Table
CHAPTER 3-	Using Tables
	Using Datasheet View
	Navigating in Datasheet View
	Adding Records in Database View
	Editing and Deleting Records in Datasheet View
	Inserting New Fields
	Renaming Fields
	Deleting Fields
	Import and Link
CHAPTER 4-	Field Properties
	Setting Field Properties
	The 'Field Size' Property
	The 'Format' Property for Date/Time Fields
	The 'Format' Property for Logical Fields
	Setting Default Values for Fields
	Setting Input Masks
	Setting Up Validation Rules and Responses
	Requiring Field Input
CHAPTER 5-	Joining Tables in a Database
	The Relationships Window
	Enforcing Referential Integrity
CHAPTER 7-	Queries
	Using the Simple Query Wizard
	Designing Queries
	Joining Tables in a Query
	Adding Criteria to the QBE Grid
	Running A Query
	How is Using the QBE Grid Writing SQL Code?

	Sorting Query Results
	Hiding Fields in a Query
	Using Comparison Operators
	Using 'AND' and 'OR' Conditions
CHAPTER 8-	Advanced Queries
	Using the 'BETWEEN...AND' Condition
	Using Wildcard Characters in Criteria
	Creating a Calculated Field
	Creating 'Top Value' Queries
	Parameter Queries
CHAPTER 9-	Advanced Query Types
	Select Query
	Parameter query
	Make-Table Queries
	Update Queries
	Append Queries
	Delete Queries
	Crosstab Queries
	The 'Find Duplicates' Query
	The 'Find Unmatched' Query
CHAPTER 10-	Creating Forms
	Forms Overview
	The Form Wizard
	Creating Auto Forms
	Using Forms
	Form and Report Layout View
	Form and Report Design View
	Viewing the Ruler and Gridlines
	Creating a Form in Design View
CHAPTER 11-	Form & Report Controls
	Selecting Controls
	Deleting Controls
	Moving and Resizing Controls
	Sizing Controls 'To Fit'
	Aligning, Spacing and Sizing Controls
	Formatting Controls
	Viewing Control Properties
CHAPTER 12-	Using Controls
	The Controls Group
	Adding Label Controls

	Adding Logos and Image Controls
	Adding Line and Rectangle Controls
	Adding Combo Box Controls
	Adding List Box Controls
	Setting Tab Order
CHAPTER 13-	Sub forms
	Creating Sub forms
	Using the Sub form/Sub report Control
CHAPTER 14-	Reports
	Using the Report Wizard
	Using Basic Reports
	Creating a Report in Design View
	Sorting and Grouping Data in Reports
	Creating Calculated Fields
CHAPTER 15-	Sub reports
	Creating Sub reports
CHAPTER 16-	Charting Data
	Using Charts
CHAPTER 17-	Macros in Access
	Creating and Using Macros
	Macro Actions
	Assigning Macros to a Command Button
	Conditional Macros and Option Groups
	Using Group Names in Macros
	Creating Autoexec Macros
CHAPTER 18-	Macros in Access
	Creating a Standalone Macro
	Assigning Macros to a Command Button
	Using Program Flow with Macros
	Creating Autoexec Macros
	Creating Data Macros
CHAPTER 19-	Creating and Navigation Forms
	Creating a Form
	Creating a Navigation Form
	Controlling Startup Behavior
CHAPTER 20-	Advanced Features
	Getting External Data

	Exporting Data
	Setting a Database Password
	Using Help
Chapter 21	More with Access Database
	Split Database
	Get Data from Email Reply
