Angular 2 Contents

- Prerequisites of Angular 2
  - Basic Javascript
  - Basic HTML
  - Basic Node,NPM
  - Module and Module Loaders
  - Modules and Module Loaders
  - ES 2015
  - Typescript
  - Angular 1
- Hello World Application
- Components
  - Inline templates and Data Binding
  - Using External templates
  - Inter-Component Communication
  - Styling Components
  - Style Encapsulation
- Angular Templates
  - Interpolation and Expressions
  - Event bindings and statements
  - Repeating data with *ngFor
  - Removing elements with *ngIf and *ngSwitch
  - Hiding elements
  - Adding classes and styles
- Services
  - Services introduction
  - Dependency Injection
  - Creating services
  - Wrapping 3rd-party Libraries
- Routing
  - Routing Introduction
  - Define routes for Pages
  - Link to routes
  - Navigate from code
  - Route Guards
  - Resolve
  - Route based link styling
  - Lazy loading
- Creating forms and Validation
  - Using data models for type-safety
  - Template based forms

- o Model Driven forms
- o Two way data bindings
- o Custom validators
- Communicating Between Components
  - o Passing Data into child components
  - o Passing data out of child components
- Reusing Components with Content Projection
  - o Content Projection
  - o Multiple Slot Content Projection
- Pipes
  - o Build-in Pipes
  - o Custom Pipes
  - o Filtering Data
  - o Sorting Data
- Dependency Injection in Detail
  - o Dependency Injection in Overview
  - o OpaqueToken
  - o @Inject() Decorator
  - o Alternative Provider Methods
- Directives and Advanced Components
  - o Modal Component
    - ▪ Routing to the same component
    - ▪ DOM Manipulation
    - ▪ Using the @ViewChild() Decorator
  - o Directives
- More on Components and Custom validators
  - o Few tricks and Techniques on Components
  - o Custom validator directives
- Communicating with Servers
  - o RxJs Introduction
  - o Moving data storage to the Server
  - o Authentication
- Unit Testing
  - o Unit testing introduction
  - o Karma
  - o Services
  - o Isolated Component Tests
- Integrated Testing
  - o Setup
  - o Testing components
- Taking Angular App to Production
  - o Linting
  - o Tuning RxJs Requests
  - o Enabling Production Mode

- Basic Deployment
- AOT Compiler
- Tree Shaking and Bundling
- Webpack
- Optimistic Bundle Download
