

Animal Around Us

When we look in our surrounding, we discover different kind of animals. Animals are found all over the world. They differ in sizes, shapes, color and in kind of places they live in. Animals are living beings and need food, water, and shelter to live.

Types of animals are:

Wild Animals – Animal that lives in nature / forest (i.e. shelter is not provided by man) and are responsible for getting their own food and water are called wild animal. Some of the wild animal we can see in zoo. Wild animals are fierce and dangerous. Lion is called ‘The king of Jungle’. Example includes foxes, deer, lion, bear, giraffe etc.

Lion

Bear

Deer
