APP (SOFTWARE) GUIDE

GUITAR PRO (Windows & Mac) – Works with Guitar Pro (.gp5) files. Can be used both for Guitar and Piano (Keyboard).

Pros:

– Preservation of Original Information (Dynamics, Articulations, Notes, Chords, Text Info, etc)

– Comparatively better Sound Quality

– Easy Navigation & Track Selection

Cons:

– Needs a Desktop or Laptop for complete functionality

SYNTHESIA (Windows & Mac) – Works with MIDI files. Can be used only for Piano (Keyboard)

Pros:

– Good Visual Interface

– Decent Sound Quality

– Ease of Use

Cons:

– Complexity in Track Selection (Track Names not displayed)

– Lack of Preservation of Original Information

– Original Text Information not displayed

– Incorrect Representation of some Notes

NOTE: Due to the complexity and lack of Track Names in the Track Selection menu, we recommend that you listen to the preview of each track to identify the Melody / Chords / BGM tracks.

GUITAR TAB (Android) – Works with Guitar Pro (.gp5) files. Can be used only for Guitar.

Pros:

– Good Sound Quality

– Ease of use

– Preserves Text Info (Notes & Chords)

– Preserves most of the Original Information

Cons:

– Limited features in free version (No instrument display, no speed control, etc)

– Incorrect Representation of some Notes

– Incapable of Replicating Automations

MULODY GUITAR (iOs) – Works with Guitar Pro (.gp5) files. Can be used in a limited manner both for Guitar & Piano.

Pros:

– Good Visual Representation for instrument display

– Preserves most of the Original Information

– Preserves Text Info (Notes & Chords)

Cons:

– Instrument display not flexible

– Sound Quality not so good

– Incorrect Representation of some Notes

– Incapable of Replicating Automations

TUX GUITAR (Windows, Mac & Android) – Works with Guitar Pro (.gp5) files. Can be used both for Guitar and Piano (Keyboard).

Pros:

– Decent Sound Quality

– Preserves some Text Info (Notes & Chords)

Cons:

– Incorrect Representation of some Notes & Information

– Incapable of Replicating Automations

SOUNDSLICE (Online Player) – Works with Guitar Pro (.gp5) files. Can be used both for Guitar and Piano (Keyboard).

Pros:

– Good Visual Representation

– Decent Sound Quality

– Ease of Use

Cons:

– Incorrect Representation of some Instruments

– Original Text Information not displayed

– Incapable of Replicating Automations

TEFpad (iOs) – Works with Guitar Pro (.gp5) files. Can be used both for Guitar and Piano (Keyboard).

Pros:

– Good Sound Quality

– Preserves most of the Original Information

– Preserves Text Info (Notes)

Cons:

– Swing styles represented incorrectly

– Incorrect Representation of some Notes

– Incapable of Replicating Automations

CHORDANA PLAY (Android & iOs) – Works with MIDI. Can be used only for Piano (Keyboard).

Pros:

– Good Visual Representation similar to Synthesia

– Decent Sound Quality

Cons:

– Difficulty in Track Selection (Track Names not displayed)

– Incorrect Representation of some Notes & Chords

– Original Text Information not displayed

– Incapable of Replicating Automations

NOTE: Due to the complexity and lack of Track Names in the Track Selection menu, we recommend that you listen to the preview of each track to identify the Melody / Chords / BGM tracks.

Features to get acquainted with while using any of the mentioned Apps / Software:

– File Browser

– Track Selector (Melody, Chords, BGMs, etc)

– Display Format (Staff Notation / Tabs)

– Speed Control (Tempo Adjustment)

– Metronome & Count Down

– Instrument View

– Adjusting Track Volumes

– Muting and Soloing Tracks

NOTE: WE RECOMMEND USING GUITAR PRO 5 FOR BEST RESULTS AS IT PRESERVES ALL THE ORIGINAL INFORMATION ACCURATELY. GUITAR PRO 5 AND OTHER SOFTWARE LINKS WILL BE AVAILABLE IN THE "SOFTWARE DOWNLOADS" SECTION AFTER THE PURCHASE.
