About Automation Anywhere Training

Robotics Automation is one among such innovations which have made a huge impact on the present business processes, medical and in many other respective areas.

Why Is The Demand For Robotics Automation Anywhere Tool?

- It supports different integration services which are having different workflow modules. This factor depicts the extent of its high reusability levels.

- Offering citric environment automation and desktop are one among major automation benefits of this tool.

- Automation Anywhere architecture provides the scope for unbelievable evolutionary features.

- Its speed of implementation of automation tasks is very high.

- Complete knowledge of all the in-depth concepts of Automation Anywhere and its varied applications.

- Leverage skills in relation to data manipulation within the automation workflow.

- Leverage skills regarding the Automation Anywhere working infrastructure.

- Hands on experience in debugging issues.

- Our institute will be the perfect choice to help the aspirants leverage complete automation industry skills in working on the Automation anywhere tool.

Who should take this course?

Anyone with basic programming knowledge can take up this course.

- Fresher graduates
- Working professionals
- Business intelligence professionals

Digital Marketing professionals All fresher engineers and professional who want to start career in Robotic Process Automation can take up this course.

Automation Anywhere Training Course Overview

Introduction To Automation Anywhere

- Introduction to Automation Anywhere

- Automation Anywhere Architecture

- Automation   Anywhere   Dashboard

Automation **Anywhere Control Room**

- Deploy Project

- Add Clients

- Operations Room

Task Bots

- Recording Task

- Creating Task Overview

on Task Editor

- Features of Task Editor

Different sections in AA Commands Categories Keystrokes / Mouse

- Insert Keystrokes
- Insert Mouse Click
- Insert Mouse Move
- Insert Mouse Scroll

Programs / Files / Windows

- Open program/File
- Files/Folders
- Window Actions
- Log To File
- Manage Windows Controls
- Object Cloning
- System

Conditions / Loops

- If/Loop
- Pause / Delays / Wait Internet
- Web Recorder
- Launch Website
- Send Email
- Internet Connection
- SOAP Web Service
- REST Web Service Tasks /

Scripts

- Run Task
- Stop   Task

Applications

- Read from CSV/Text
- Excel
- Database
- XML o Interactive

- Prompt
- Message Box o Miscellaneous
- Clipboard
- Comment
- Play Sound
- Variable Operation
- String Operation

System

- Printers
- Services

Advanced
