

# HOLISTIQUE SOLUTIONS

## CONSULTING, COUNSELING, COACHING

### Greetings

Dermatoglyphic Multiple Intelligence Test (DMIT) is a **U.S. Patented** Concept (7406186) which is based on the study of fingerprints and ridges present on the finger tips. It is a complete auto assessment interface that is uniquely adaptive, intuitive & responsive to any skills set. DMIT presents a scientifically tested assessment program that takes into account every child's unique potential and affinity towards a particular section, developing specific core competencies from childhood.

**Holistique Solutions** firmly believes that from a very young age, the ideal education needs to be holistic, cognitive & should facilitate the involvement of multiple intelligence test based learning. Every child is born with the faculty to unbridle the full spectrum of human abilities, ideas & expertise. DMIT helps unlock and augment child's growth potential with tested techniques.

DMIT proves to be effective in charting out a **Life's Plan** based upon

- 1) Personality Traits
- 2) Brain Dominance
- 3) Learning Style
- 4) Parenting Method
- 5) Multiple Intelligence
- 6) Career Guidance Recommendations

It is a 3 step procedure

- a) All the 10 fingerprint scans are taken on the 1<sup>st</sup> day
- b) The scans are sent to Malaysian lab for processing.
- c) The report is explained via experienced counselor.

DMIT report gives parents a unique opportunity to full-proof the child's future. Where most tests become just statistical analysis tool, the DMIT report produces an optimal evaluation statement (**around 90% accurate**) as well as comprehensive set of guidelines that would shape the natural talent & focus of the child.

Encash your child's inborn potential & secure his/ her future for a small & onetime investment.

Please contact Holistique Solutions team for further clarification.

Sincerely,

Amol Jambhekar
