

Dashboard / Reports Automation

[MS-Excel]

Key benefits of dashboard

Visibility

- Dashboard delivers great visibility and overview of business on a single screen. Which helps to know exactly what's going on in all aspects of business (depending on the dashboard data).

Time Saving & Accuracy

- Many executive spends good amount of time logging into reports and drilling down or consolidation of information required. With the help of dashboard automation process, raw data can be converted into useful information within no time along with accuracy.

Make data more valuable

- Data is one of the most valuable assets of any organization. But leveraging it is a time-consuming and costly affair. Dashboard provides right data reporting solution which lead into improvement process for business.

Easy to understand

- Dashboards provides organized, structured and consolidated data along with graphical representation. Which is not only easy to understand but contribute in making fast and effective decision for business.

Data analysis

- Dashboard provides different options to prepare and present data, which make analysis work more easy and fast.

This is to give an overview of Dashboard creation and Reports automation graft.

Data used is dummy and has no relevance with any kind/source.

Static and Dynamic dashboard can be customized as per client's requirement.

Along with dashboard restructured reports to support dashboard can be added.

Our verticals: Corporate Trainings, Web Solutions, Application Development & Automation/Integration projects. Few of our corporate clients:
