

Sanskrit is a beautiful language to learn which connects us to our culture and our roots. At the same time, it is considered as a scoring subject at the school level. But scoring top marks in Sanskrit, requires sound foundation and excellent conceptual clarity.

1. Do you feel your child needs help with mastering the basic grammatical concepts? Shabda, Dhatus, elementary sentence constructions?

2.If your child is in 10<sup>th</sup> do you require that “extra help” that would enable him/her ace the board exams?

If so, please feel free to reach out to me.

I teach Sanskrit online for classes 6-10 (CBSE) Classes with me are productive, instructive and enjoyable. Detailed explanation of the lessons, methodical revision, spot quizzes, and homework - all form part of my teaching strategy. Previous year question papers are analysed - especially for 10th std students. My medium of communication is English and I am also fluent in Hindi and Odia with a working knowledge of Kannada. I have an excellent track record and am happy to say that all my students have always performed very well

Hoping to hear from you. शुभं भूयात्
