

SIMPLE POSITION FOR DIFFERENT CONDITION (ie FOR VARIOUS POSITIONS OF SOLIDS ON HP & VP)

Start the simple position as given in the diagram

Resting on one of the base edges on **HP**. Start the top view with one of the right hand side edge of the top view should be perpendicular to **XY**. Tilt the front view according to the condition given in problem.

Resting on one of the base edges on **VP**.

- Start the front view with one of the right hand side edge should be perpendicular to **XY** line.
- Draw the corresponding top view.
- Tilt the top view according to the condition given in the problem.

Resting on one of its corner on **HP**. Start the top view with one of the corner of the top view should be on the right hand side as given below.
