APRIL 22, 2021 IS
EARTH DAY

”

The very real and true story of

MR. CLIMATE CHANGE

Once upon a time not too long ago, in fact, even until now, humans burned lots and lots of fossil fuels to fly planes, drive cars, and keep houses bright and warm at night.

This puts greenhouse gases into the air. Those gases wrap around the planet like a blanket and make everything hotter.

A hotter planet means bigger storms. It melts towering chunks of ice as big as cities, so oceans rise and make it harder for animals to find places to live.

It's a really, really big problem, and there are a lot of smart people working hard on it, and there's also lots that you can do a small person with a big heart to help.

Our Vision

Living a more Sustainable and Climate-friendly life

Crux is all about "Balancing"
Fundamental Rights Art. 21
TO Fundamental Duties Art. 51-A (g)

Living Sustainably

Breathing clean air is a fundamental right of every Indian citizen, however this can't be enjoyed in isolation with fundamental duty to protect and improve the natural environment and have compassion for all living - "We Have Rights Untill We Owe Our Duties"

Recycle.Reduce.Refuse

The general idea is to reduce the amount of trash we produce. That means only consuming what is needed, refusing single-use plastics, reducing the amt of waste we create & recycling what can be recycled.

Making - Atmanirbhar Bharat

Buying from local farmers, producers, and shops reduces our carbon footprint because less pollution is created during transport. It also helps the local economy grow and thrive - #vocal4local
