

## Finding Documents

- Introduction
- Overview
- find()
- Equality
- Projection
- Comparison
- \$not
- \$in
- Arrays
- \$all
- \$nin
- Dot Notation
- Sub-Document
- null and \$exists
- And
- More Projection
- Cursor
- sort()
- limit()
- skip()
- findOne()

## Indexing

- Overview
- Scan Is Bad
- Index Theory
- Sort Uses Index
- Index Types
- Create Index
- system.indexes collection
- explain()
- nscanned
- Multi-Term Query
- Comparison
- Scanned vs. Returned
- dropIndex()
- Nested Fields
- Array Field
- Sort
- Unique
- Sparse
- Compound
- Sort Direction
