About the Instructor

I am a self-taught Guitarist. I picked up the Guitar 20 years ago. I developed a passion towards the instrument and after playing the instrument for all these years I have discovered something amazing about it. I have played with different musicians and at different musical situations. The experience and exposure I gained in these years has been the back bone and outcome of the GUITAR FOUNDATION AND GUITAR BASICS workshop. This will help any individual to pick up the guitar and strum his favorite tunes and compose his own music and surprise everyone If they complete the sessions successfully. This will mark a beginning of a new journey and explore the unlimited possibilities of the instrument.
